

Interim Report Q2

January - June 2023

Technology that
understands, simplifies
and predicts human
intentions and actions.

High Organic Growth and increasing license revenues

April-June 2023

- Net sales amounted to SEK 68.8 (59.8) million, an increase of 15% compared to the corresponding period the previous year. Underlying invoicing was approximately SEK 6 million higher during the quarter, but as iMotions started periodization of recurring revenue as from Q3 2022, this revenue will instead be recognized over the contract period. With the above effect in consideration, the organic growth for the total group was 25%.
- EBITDA amounted to SEK -33.0 (-41.6) million. The higher result is due to increased sales during the period and that costs are in line with the cost reduction program.
- Operating loss amounted to SEK -70.7 (-76.3) million. Depreciation of the surplus value created in conjunction with the Affectiva and iMotions acquisitions amounts to SEK 28.8 million.
- Earnings after tax per share is -1.95 (-2.92), and after full dilution -1.95 (-2.92)
- Cash and cash equivalents totaled SEK 180.4 million at the end of June.
- During June Smart Eye signed a breakthrough deal for AIS driver monitoring system for fleets with Linde. This marks the first time Smart Eye's new AIS system will be delivered to a major heavy vehicle fleet owner for aftermarket implementation.

January-June 2023

- Net sales amounted to SEK 133.2 (113.3) million, which corresponds to an increase of 17%. The organic growth amounted to 28%
- Operating loss amounted to SEK -152.6 (-147.8) million. Depreciation of the surplus value created in conjunction with the Affectiva and iMotions acquisitions amounts to SEK 57.0 million. The period was burdened by one-time costs due to the funding process amounting to SEK 2.8 million.
- Profit after financial items amounted to SEK -152.6 (-148.0) million.
- Earnings after tax per share is -4.27 (-5.66), and after full dilution -4.27 (-5.66).

* The subscription price in the rights issue carried out in February 2023 was SEK 25.50 per share, corresponding to approximately 58% of the share's fair value on the last day before the separation of subscription rights. The comparison figures are recalculated, as a consequence of the rights issue, with the calculated bonus factor of 1.18.

Comments from the CEO

The second quarter ended on a high note with a strong organic growth of 25%. At the same time, the costs are under control in accordance with the savings program implemented last year. Right now, everything is proceeding according to our plans. The demand for our technology in the market remains strong, fueled by favorable safety regulations in Europe.

Automotive

The automotive business area is growing with 73 percent compared to last year. Even though license revenues more than doubled, it is still mostly because of ramp-up of production in Korea and to a lesser extent in China. We are on the verge of ramping up with our US, Japanese and European customers, which is expected to happen in the upcoming quarters. That will further increase the growth rate. We are currently delivering the final software in several projects with global OEMs and we are looking forward to the stable and long-term revenue streams that will come as a result thereof.

Furthermore, the market momentum is very strong, and we are in the final negotiation phase for several large OEM contracts. Our proven technology is very sought after in the market.

We have started to deliver the aftermarket system AIS to Linde, one of the world's largest industrial gas suppliers. Linde started to test early prototypes last year which convinced them to deploy the safety system for all their trucks on the Scandinavian market. The breakthrough order has spurred further interest from other customers representing large fleets of trucks and buses.

Behavioral Research

The research side of Smart Eye had yet another quarter of profitable growth. The organic growth is at 14 percent, in line with our long-term growth rate pre-covid. We are

anticipating two upcoming strong quarters since the research market typically is stronger towards the end of the year, due to research equipment budgets being spent before the end of the year.

Final Words

We are only at the very early beginning where OEMs are starting to ramp up new models with our technology. The vast majority of the car models that we have won are not yet produced at full capacity. But as more cars now start to enter production, the increase in our license revenues will accelerate. That is the foundation to our profitability mid next year, given that the research unit is already profitable. We are entering a very exciting moment in the history of the company.

Martin Krantz
CEO Smart Eye

Estimated value of obtained design wins

As of the report for the second quarter of 2018, the company provides information on the estimated market value of obtained design wins at the time of publication of the report. The figures in brackets show the levels at the time of the publication of the preceding report, which in this case was May 16th, 2023.

The total estimated value of the company's 217 (217) design wins announced to date amounts to SEK 4,365 (4,365) million over a product life cycle.

If the company's system had been used in all car models on existing platforms by the 19 (19) car manufacturers with whom design wins have been communicated, the estimated value would amount to at least SEK 8,460 (8,460) million over a product life cycle.

The calculations have been made by the company based on OEMs estimated production volumes of car models and may change due to changed conditions for life cycle estimates of the car platforms.

One of the main reasons for the large number of Driver Monitoring System (DMS) design wins that has been awarded during the last year is due to the legislation that is about to take effect in Europe. Advanced Driver Distraction Warning will be required for new type approvals starting July 2024 and as of July 2026 all new vehicle registrations will require the same technology. Given the length of an automotive development project most of the OEMs have been making their decisions during 2021 and 2022, to fulfil the legislation once it becomes effective.

Design Win Year / (MSEK)	2015-2021	2022	2023	Total
Estimated revenue over the product life cycle from current design wins	2 275	1 560	530	4 365
Estimated revenue over the product life cycle from possible additional design wins with existing car manufacturers on existing platforms	3 975	100	20	4 095
Estimated revenue over the product life cycle including current and possible additional design wins with existing car manufacturers on existing platforms	6 250	1 660	550	8 460

The Group

Revenue

Second quarter 2023

Net sales for the period April to June 2023 amounted to SEK 68.8 (59.8) million, which is an increase of 15%. The growth is due to higher business activity in both business areas. Underlying invoicing was approximately SEK 6 million higher during the quarter, but as iMotions started periodization of recurring revenue as from Q3 2022, this revenue will instead be recognized over the contract period. With the above effect in consideration, the organic growth for the total group was 25%.

Net sales for the **Automotive** business area (Automotive Solutions and Fleet & Aftermarket) during the second quarter was SEK 19.9 million, compared with SEK 11.4 million in the second quarter of the previous year. Revenue from ongoing development projects is on a high level and project activity is ramping up due to the design wins that have been awarded lately. The increase in sales is also due to the increase of license revenue and the increase of revenue from our fleet aftermarket product. The organic growth in the Automotive business area is 73%.

For the **Behavioral Research** business area (Research Instruments, Media Analytics and iMotions) net sales during the second quarter amounted to SEK 49.0 (48.5) million. The growth of 1% is due to consistent business activity in all three business units. Organic growth in the Research business area, i.e. adjusted for the introduction of periodization of recurring revenue in iMotions, is 14%.

January – June 2023

Net sales amounted to SEK 133.2 (113.3) million, which is an increase of 17% compared to the corresponding period previous year, and i.e. adjusted for the introduction of periodization of recurring revenue in iMotions, the organic growth was 28%.

Net sales for **Automotive** (Automotive Solutions and Fleet & Aftermarket) during the first six months was SEK 33.6 million, compared with SEK 22.8 million for the same period previous year, corresponding to an increase of 47%. The increase in sales is mainly due to increased activity in ongoing development projects and the increased demand of the fleet aftermarket product.

Behavioral Research business area (Research Instruments, Media analytics and iMotions) net sales during the period amounted to SEK 99.6 (90.5) million, which is an increase of 10% compared to the corresponding period previous year, and i.e. adjusted for the introduction of periodization of recurring revenue in iMotions, the organic growth was 23%.

Results

Second quarter 2023

EBITDA amounted to SEK -33.0 (-41.6) million. The higher result is due to increased sales during the period and that costs are in line with the cost reduction program.

EBITDA was 11.2 MSEK better than last quarter, which is mainly due to the cost reduction program but also due to higher sales in the quarter.

The operating result for the second quarter totaled SEK -70.7 (-76.3) million. Depreciation of the surplus value created in conjunction with the Affectiva and iMotions acquisitions amounts to SEK 28.8 million in the quarter.

January - June 2023

EBITDA amounted to SEK -77.2 (-77.7) million. The result is in line with last year's first half but compared to last year's second half, the EBITDA has increased significantly which is mainly due to increased sales and the effect of the cost reduction program.

Operating loss amounted to SEK -152.6 (-147.8) million. Depreciation of the surplus value created in conjunction with the Affectiva and iMotions acquisitions amounts to SEK 57.0 million. The period was burdened by one-time costs due to the funding process amounting to SEK 2.8 million.

Financial position

In addition to cash and cash equivalents of 180.4 SEK million, the Group has two unutilized bank overdrafts facilities of SEK 20 million and DKK 8 million.

Important events during the period

During June Smart Eye signed a breakthrough deal for AIS driver monitoring system for fleets with Linde. This marks the first time Smart Eye's new AIS system will be delivered to a

major heavy vehicle fleet for aftermarket implementation.

Events after the end of the period

No events after the period to report.

Parent company

Revenue

Second quarter 2023

Net sales for the period April to June 2023 amounted to SEK 33.6 (24.0) million, which amounts to an increase of 40% compared with the same period last year.

January - June 2023

Net sales for the period January to June 2023 amounted to SEK 58.6 (44.6) million.

Results

Second quarter 2023

The operating result for the second quarter totaled SEK -49,5 (-25.9) million. The main reason for the lower result, compared to the same period last year, is the addition of product development resources in the parent company.

January – June 2023

The operating result for the first two quarters totaled SEK -110.6 (-60.2) million.

Significant risks and uncertainties in summary

Operational risks

The business operations are subject to risk factors that could impact the company's commercial and financial position. The risks relate in part to development operations proceeding as planned and in part to the company's success in recruiting qualified personnel to the necessary extent.

Financial risks

The company is financed through share capital and finalized a Rights Issue late February. The purpose of the Rights Issue was to strengthen the company's financial position and finance the remaining capital requirement until the

company becomes cash flow positive, which is expected during the second half of 2024. Should the company not generate revenue to the extent and over the time perspective assessed by the Board, this could result in additional capital requirements.

The most significant risks related to the revenue is the planned ramp up in license revenue, should the automotive industry face further component issues or additional delays in OEM projects.

Subsequently, should the inflationary situation in the global economy accelerate, there is a risk of continued upward pressure on the cost base of the company.

Longer term as the sales increase, the company will face an increased currency exposure since most of the company's sales will be denominated in a currency other than Swedish kronor.

Market risks

Eye tracking is an emerging technology, whereby the company's products are currently used in behavioral research and as integrated products in the automotive industry. Regarding the Automotive business segment, a delay or the non-materialization of a launch of eye tracking in the automotive industry could entail a risk of a lower-than-expected growth rate. The future growth rate is strongly connected to the introduction of legislation in the European Union and at the time of publishing this report, there are no indications of a delay of this legislation. In the Research business area, the biggest market risk is the availability of funding in the academic field. A general decline in funding could be partly offset by an increased penetration of the market as the presence of the group's technology is still emerging.

Otherwise, regarding risks and uncertainties, refer to the 2022 Annual Report, page 35-36.

Transactions with related parties

Except for shared based incentive programs and intercompany transactions there were no transactions with related parties during the period.

Share Information

The Company is listed on Nasdaq First North Growth Market. Certified Advisor is Erik Penser Aktiebolag.

Number of shares

The number of shares now totals 35,192,232.

Share-based incentive scheme

At the AGM 2nd May 2023 it was resolved on the adoption of a long-term incentive program in the form of performance-based share options directed at employees within the Smart Eye group. The maximum number of performance shares will amount to 580,000.

The company also has four current incentive programs adopted by the AGMs 8th May 2020, 14th April 2021, the EGM 8th October 2021 and the EGM 29th June 2022.

Dividend policy

The Company is in a development phase and any surpluses are scheduled for reinvestment in the Company's development. The Board is not intending to submit a dividend proposal.

Accounting policies

The interim report has been prepared in accordance with the Annual Accounts Act and the general advice and guidelines of the Swedish Accounting Standards Board, BFNAR 2012:1, Annual Reports and Consolidated Financial Statements (K3).

This interim report has not been reviewed by the company's auditor.

Signing of the report

The Board of Directors and the CEO assure that the interim report provides a fair overview of the Parent Company's and the Group's operations, position and results and describes the significant risks and uncertainties in the Parent Company and the companies included in the Group.

This information is information that Smart Eye AB (publ) is obliged to make public pursuant to the EU Market Abuse Regulation. The information was submitted for publication at 8:30 am CET on August 30th, 2023.

Smart Eye is the global leader in Human Insight AI, technology that understands, supports and predicts human behavior in complex environments. Bridging the gap between humans and machines for a safe and sustainable future.

Today, our technology is embedded in next-generation vehicles, leading the way towards human-centric mobility through Driver Monitoring Systems and Interior Sensing solutions. Our Research Instruments offer unparalleled insights into automotive, aviation, assistive technology, behavioral science and many more fields.

Our subsidiary Affectiva is humanizing technology by pioneering Emotion AI, helping companies gain a deeper understanding of how consumers engage with their content, products and services, in automotive, media & entertainment, market research and beyond.

Our subsidiary iMotions provides the world's leading biosensor software platform, that synchronizes data streams in real time from multiple sensors.

Smart Eye was founded in 1999 and is headquartered in Sweden with offices in the US, UK, Germany, Denmark, Egypt, Japan, Singapore and China. A publicly traded company since 2016, our customers include NASA, Nissan, Boeing, Honeywell, Volvo, GM, BMW, Geely, Harvard University, over 1,300 research organizations around the world, 70% of the world's largest advertisers and 28% of the Fortune Global 500 companies.
