

Klimator Signs Commercial Partnership Agreement with Bosch

Klimator signs partnership agreement with Bosch that focuses on the service platform, L.OS – Logistics Operating System, which is Bosch's service platform for logistics fleet management and will include Klimator's cloud-based platform, Road Condition Data (RCD). The objective is to provide seamless access to road weather intelligence in Europe. The non-exclusive partnership will be initiated during Q4 2024.

It's an important step for Klimator that such an established and well-known partner as Bosch chooses our solution. We see that the demand for the type of system like RCD is increasing from both a safety point of view and with the increased focus on sustainable and smart solutions. At present, however, it is difficult to quantify the order value as the revenue lies so far in the future," says Viktoria Bogren, Head of Automotive

About Road Condition Data

Road Condition Data (RCD) is a cloud-based Data-as-a-Service platform providing actionable data on current and future road weather, for proactive mobility. The RCD platform uses a combination of ruled-based algorithms, machine learning, and immense amounts of real-life road and environment data. The information enables actors within the automotive industry to enhance the driving experience, the functionality, operability, and safety of advanced driver support systems (ADAS) and autonomous driving (AD) technologies.

About Klimator

Klimator AB is a publicly listed software company with over 30 years of research in applied road climatology. The company has a broad product portfolio within detective and predictive road weather data and can with high precision deliver both road weather forecasts up to 18 hours ahead and real-time road condition information. With its innovations, Klimator provides accurate and safe road weather data, for the winter maintenance industry to make well-informed decisions about appropriate measures, and for the automotive industry with the aim of enhancing the driver experience, improving advanced driver assistance systems, and creating safe and scalable autonomous driving.

About Klimator

Klimator AB is a publicly listed software company with over 30 years of research in applied road climatology. Klimator has two innovations – the data platform Road Condition Data (RCD), providing predictive high precision road weather information, and the sensor fusion solution AHEAD providing real-time detective road weather information. With these innovations, Klimator provides precise and reliable road weather information to the winter maintenance and the automotive industries creating safer roads and enabling scalable autonomous driving (AD) and intelligent driver support systems (ADAS). In 2020, Klimator acquired HedeDanmark's business operations within connected sensors to broaden and strengthen Klimator's product portfolio.
