

Ortivus has successfully been qualified for the East of England Framework tender, opening new possibilities in the UK

We are pleased to announce that Ortivus' tender application for MobiMed ePR has been approved by the East of England NHS Collaborative Procurement Hub and has thereby qualified to be a part of the East of England Framework tender. This is an important step forward for Ortivus on the UK market as all UK Trusts can call-off electronic Patient Record (ePR) solutions from qualified companies. The framework duration is 2 years from the Commencement Date. As the framework is used to streamline the procurement process for the end customer, being on the framework has no defined order value at this point but may lead to future orders based on the framework agreement.

The East of England Collaborative Procurement Hub is a not-for-profit NHS organisation which provides member trusts and publicly-funded bodies with strategic purchasing support. That Ortivus has been qualified for the East of England Framework tender means that the company's solutions have been evaluated and approved and that Ambulance Trusts all over the United Kingdom can call-off Ortivus' MobiMed ePR.

"To be qualified for the East of England Framework is an important step in the right direction for Ortivus' further expansion on the UK-market. We look forward to the possibility of delivering the next generation electronic patient records to prehospital care all over the United Kingdom." – Says Elias Obaid, Ortivus' Sales Manager.

Ortivus are one of several competing suppliers that have qualified for the framework. The Authority will provide for a standstill period before concluding the contract. In accordance with the Regulations the contract will not be concluded before midnight on 28 February 2023. Notable is also that even upon expiry of the standstill period, the Authority will not be bound to conclude the contract with any of the qualified tenderers. Therefore, the formal appointment remains subject to the Authority entering a legally binding contract with a supplier.

About Ortivus

Ortivus develops and commercialises MobiMed, e-health and medical technology solutions for a safer and more efficient healthcare. The company was founded in 1985 and is today a leading provider of mobile digital solutions for prehospital care, worldwide. Ortivus' innovations are based on in-depth expertise in cardiology as well as decades of development together with users and customers. The company's headquarters are located in Danderyd, Stockholm. The company has, since 1998, a wholly owned subsidiary based in the United Kingdom and since 2022, a wholly owned subsidiary based in Denmark.

MobiMed is a modular platform that connects and enable real-time information sharing throughout the prehospital care chain. It is currently used by over 12,000 paramedics in over 2,700 emergency vehicles. The platform, MobiMed, consists of several product modules that are completely integrated but can also be used stand-alone. MobiMed comprises four main solutions: MobiMed Monitor, that measures, monitors and shares patients' vital parameters and ECG in real-time, MobiMed ePR, - an electronic patient record for decision support, collection of patient data and clinical documentation, MobiMed enRoute, - a tool for navigation and case management, and MobiMed Life - a range of stand-alone defibrillators.

MobiMed saves vital seconds and enable healthcare professionals make the right decisions in critical situations. MobiMed also contributes to improved quality of care and saved resources.

Ortivus Class A and Class B shares are listed on the NASDAQ Stockholm Small Cap list.
