

## BeammWave strengthens its presence in Asia through expansion into South Korea

**BeammWave announces that the company is expanding its sales network in Asia by adding dedicated sales representation in South Korea. This addition complements BeammWave's existing representation in Japan and Taiwan, further strengthening the company's footprint in the region.**

The South Korean representation will focus on driving regional sales, supporting local partnerships, and enabling the adoption of BeammWave's digital beamforming technology. As South Korea is a leading market in the ongoing development of 5G and future 6G technologies, a local presence provides enhanced opportunities for close collaboration with network operators as well as device and infrastructure manufacturers.

By building on the established progress in Japan and Taiwan, BeammWave is further strengthening its position to deliver integrated mmWave solutions across East Asia.
