## **Saniona and Boehringer Ingelheim extend research collaboration with one year**

**Saniona (OMX: SANION), a clinical stage biopharmaceutical company, today announced that the ongoing ion channel research collaboration with Boehringer Ingelheim has been extended with one year.**

“The program is currently in the lead optimization stage following the successful research milestone in October 2024. We look forward to continuing our partnership with Boehringer Ingelheim scientists in developing a potentially first-in-class therapeutic approach aimed at addressing cognitive impairment associated with schizophrenia, an aspect of the disease that severely impacts patients’ daily lives”, said Karin Sandager, CSO of Saniona.

Saniona and Boehringer Ingelheim entered the ongoing research collaboration in 2020, aiming to discover new treatments for schizophrenia by targeting a CNS ion channel. Under the agreement, Boehringer Ingelheim holds exclusive worldwide rights to research, develop, manufacture, and commercialize the therapeutics resulting from the collaboration. Saniona is eligible to receive up to €76.5 million in milestone payments, as well as royalties on worldwide net sales.
