C/I ratio for 4Q23 included a provision of ISK 100m made in connection with an administrative fine, the C/I ratio has been restated so it excludes the provision 2. Including 3Q23 profit for 30.9.23 and 1Q24 profit for 31.3.24.

Directors' Report

The Board of Directors and the CEO of Íslandsbanki hf. ("the Bank" or "Íslandsbanki") present this report together with the reviewed Condensed Consolidated Interim Financial Statements of Íslandsbanki hf. and its subsidiaries (together referred to as "the Group") for the period 1 January to 30 September 2024. Íslandsbanki is a universal bank offering comprehensive financial services to households, corporations, and institutional investors in Iceland. The Group is one of Iceland's largest banking and financial services groups, with a strong domestic market share.

Operations in the reporting period

The profit from the Group's operations for the reporting period amounted to ISK 17,963 million, and the return on equity was 10.9%, compared to a target of over 10%. At the end of the reporting period the Group employed 783 full-time members of staff, 744 in the Bank and 39 in subsidiaries. The Group operates 12 branches.

Inflation continued to subtract while policy rates remained unchanged at 9.25% throughout the reporting period. As a result, net interest margins were pressured. The net interest margin was 3.0% compared to a margin of 3.1% for the first nine months of 2023, where both CPI and fixed rate imbalances within the banking book contributed to the reduction in the margin. Macroeconomic forecasts assume that the CPI will continue to subtract in the coming months, which will cause both pressure and volatility on the net interest income should policy rates not be cut at the same pace. Further, changes to taxation on fuel may cause a considerable one-off reduction in the CPI, which will further affect operations. Net fee and commission income decreased by 1.7% from the previous year, predominantly related to a year-on-year decline in net income from cards and payments processing as well as weaker capital markets negatively affecting income from asset management and investment banking – both of which are expected to grow in the coming quarters as capital markets recover. Quarter-by-quarter development has been showing growth, the net fee and commission income increased in the third quarter by 4.9%, compared to the third quarter of 2023. Fair value adjustment of real estate within Norðurturninn hf., an associate of the Bank, contributed ISK 306 million in other operating income.

The cost-to-income ratio, adjusted for administrative fines, was 44.2% for the first nine months, compared to 41.3% for the same period of 2023, mainly attributable to higher operating expenses. Salaries and related expenses grew by 8.5% between years and amounted to ISK 12,085 million, mainly owing to an increase in FTEs due to the Bank's commitment to further strengthen its regulatory infrastructure and overall governance, and general wage agreement increases. Operating expenses rose by 6.7% between years, or by ISK 577 million, mainly related to inflation and IT expenses, which are expected to increase efficiency in the future. Costs during the third quarter were positively affected mainly due to how accrual of vacation are accounted for which results in lower cost-to-income ratio than for other quarters. As such, a cost-to-income ratio of 41.4% was reported in the third quarter.

Net impairment reversals on financial assets amounted to ISK 293 million compared to net impairment of ISK 13 million for the first nine months of 2023. Recalibration of models and revised macroeconomic forecast were the main drivers of impairment reversals, in particular in the third quarter where impairment reversals were high, or ISK 860 million. Despite the high inflationary and interest rate environment, asset quality remains both stable and strong where Stage 3 loans closed in at 1.6%, reducing by 0.2 percentage points from the previous quarter.

For the first nine months, loans to customers grew by 4.1%, or by 5.5% annualised. As before, mortgages remain the largest part of the loan book or 44%. LTVs for both the mortgage book and other parts of the loan book remain both healthy and stable. During the period, conversion of loans from non-indexed to CPI-linked instruments continued. As a result, the CPI imbalance was ISK 215 billion at the end of the reporting period. Due to this, net interest income is subject to more volatility and will remain under pressure, as inflation subsides, compared to a more neutral CPI position.

At the beginning of October, the Bank submitted a report on its remedies related to the settlement with the FSA which the Bank entered into in April. The settlement agreement related to on onsite inspection of the Bank's AML control framework pursuant to Act no. 140/2018 on Measures Against Money Laundering and Terrorist Financing (AML). The Bank has carried out remedies pursuant to the settlement agreement. The Bank acknowledges that AML is a continuous iterative process and is committed to continue to strengthen its infrastructure on this front.

Funding

Deposits continue to remain the Bank's largest source of funding. Deposits from customers amounted to ISK 927 billion at the end of the reporting period and increased by 9.0% from year-end 2023, where individuals and SMEs were the largest contributors. Customer loans to customer deposits ratio closed at 137% compared to 144% at year-end 2023.

Year to date, the Bank has remained active in the wholesale funding market and has observed the continued tightening of spreads in the global capital markets throughout the year, which was clearly reflected in the Bank's secondary levels. In January, the Bank issued 3-year senior preferred green notes amounting to NOK 500 million and SEK 500 million, followed by a 4-year senior preferred note issuance amounting to EUR 300 million in March, which was four times oversubscribed. In June, the Bank issued NOK 200 million and SEK 300 million in 3-year senior preferred deals, both at considerably tighter spreads than the January issuances. Domestically the Bank issued senior preferred bonds totalling ISK 12,450 million and covered bonds to fund its mortgage book amounting to ISK 12,823 million.

Directors' Report

During the third quarter, the Bank concluded the redemption of the remaining outstanding amount of its EUR 300 million senior preferred notes, which were due in May 2026. In late June 2024, the Bank had previously tendered for any or all of the outstanding notes and received a 91% take-up from holders. The tender and subsequent redemption were made without direct refinancing, supported by the Bank's strong capital and liquidity ratios, as well as an ample MREL buffer, all of which remain robust and well above regulatory requirements.

The Bank holds an A3 issuer rating by Moody's Ratings and a BBB+/A-2 by S&P Global Ratings.

Capital

The Bank's total capital ratio was 23.4% at the end of the reporting period and remains solid and considerably in excess of regulatory requirements, which according to the latest Supervisory Review and Evaluation Process (SREP) concluded in June 2024 are 19.7%, including all capital buffer requirements on the Bank. The latest SREP process resulted in a capital requirement reduction of 0.6 percentage points from the previous assessment. The Bank's CET1 target range is currently 16.4-18.4%, including a management CET1 buffer of 100-300 basis points on top of regulatory CET1 requirements. The current CET1 ratio is 20.2% which is 280 basis points in excess of the CET1 target, assuming the midpoint of the management buffer.

At the beginning of October 2024, the Resolution Authority of the Central Bank of Iceland approved the Bank's resolution plan and set a minimum requirement of own funds and eligible liabilities (MREL) requirement. According to the decision, the Bank must maintain an MREL ratio of 29.5%, including the combined capital buffer requirement, a reduction from the previous decision by 1.2 percentage points. The Bank's current MREL ratio is 35.6%. Further, the Resolution Authority of the Central Bank also decided on a subordination requirement for the first time. In parallel, the Bank's subordination part is set at 23.4%, which will come into effect three years following the decision.

The Bank's Annual General Meeting (AGM) held on 21 March 2024 approved repurchasing of own shares up to 10% of outstanding share capital, in addition to a conventional dividend in line with the Bank's dividend policy. Year to date, the Bank has purchased a total of 66,838,532 shares, or 3.34% of the share capital for a total of ISK 6,790 million. At the end of the reporting period, the Bank owned a total of 87,229,363 shares, or 4.36% of its own share capital.

Capital optimisation continues to be a priority for the Bank and is expected to be concluded before year-end 2025, subject to market conditions. Capital optimisation may include both organic or external growth, as well as disposals to shareholders via ordinary buyback programs, reverse auctions, or extra-ordinary dividends.

Outlook

Following steadily declining GDP growth in 2023, Iceland's GDP contracted by just under 2% in the first half of 2024. The failed capelin catch in the first quarter was a major factor but there were also headwinds in other exports, notably tourism, while private consumption shrank moderately. However, investment proved resilient to high interest rates, growing by almost 5% in real terms compared to the first half of 2023.

GDP growth is likely to have rebounded somewhat in the third quarter as the high tourist season turned out more favourably than feared and indicators such as payment card turnover suggest modest growth in private consumption in the period. For 2024 as a whole, Islandsbanki Research expects GDP to grow by 0.3%. The pace of growth is expected to pick up gradually in coming years, supported by a resumption of growth in exports, recovery in private consumption as interest rates and inflation decline, and by a rise in business as well as residential investment

The labour market is gradually inching towards equilibrium following a period of considerable excess labour demand. Unemployment averaged 3.5% of the workforce in the year to August, compared to 3.2% in the same period last year. Furthermore, the share of larger businesses reporting worker shortage has fallen significantly in recent quarters. Wage costs are also rising more slowly than before as the initial impact of recent widespread wage agreements fades and wage drift decreases somewhat. At the same time, the residential housing market has seen continuing real price increases, a situation that looks likely to persist in the coming term.

In the first nine months of 2024, inflation fell from 6.7% to 5.4% due to a combination of a cooling economy as the impact from high real interest increased, more moderate wage cost pressures, subsiding imported inflation and a somewhat more balanced housing market. The outlook is for inflation to continue abating, with Íslandsbanki Research expecting inflation to measure 4.9% at year-end.

Falling inflation and a cooling economy will likely facilitate further interest rate cuts from the Central Bank, following its first rate cut since 2020 in October. The CBI's main policy rate currently stands at 9.0%, after having been constant at 9.25% between August 2023 and September 2024. Rates could fall to 8.75% by year-end, with further rate cuts expected in 2025 and 2026.

As aforementioned, should policy rates not be cut in the same pace as inflations subsides, the Bank's earnings may become volatile and pressured. On the flip side, capital markets are expected to recover as sentiment generally shifts in line with policy rate cuts which is expected to have positive effect on the Bank's net fee and commission income.

Directors' Report

Ownership

The shares of Íslandsbanki are listed on the Nasdaq Iceland stock exchange and the Bank has one of the largest shareholder bases of a listed company in Iceland. At the end of the period the Bank had 10,766 shareholders, where 89.8% of the Bank's shares were owned by domestic parties and 10.2% by international investors. The Icelandic Government is the largest shareholder with 44.4% of outstanding shares, taking into consideration treasury shares. Shares held by the Government are administered by the Icelandic State Financial Investments (ISFI) in accordance with Act no. 88/2009. Apart from the Government, pension funds are the largest investor group, owning 34.9% of the outstanding shares. For further information on the Bank's shareholders see Note 36.

Statement by the Board of Directors and the CEO

The reviewed Condensed Consolidated Interim Financial Statements for the period 1 January to 30 September 2024 have been prepared on a going concern basis in accordance with the International Accounting Standard (IAS) 34 as adopted by the European Union and additional requirements in the Act on Annual Accounts, no. 3/2006; the Act on Financial Undertakings, no. 161/2002; and rules on accounting for credit institutions, where applicable.

To the best of our knowledge, these Condensed Consolidated Interim Financial Statements provide a true and fair view of the Group's operating profits and cash flows in the reporting period and its financial position as of 30 September 2024.

The Board of Directors and the CEO have today discussed and approved the Condensed Consolidated Interim Financial Statements for the period 1 January to 30 September 2024.

Independent Auditor's Review Report

To the Board of Directors and Shareholders of Íslandsbanki hf.

Introduction

We have reviewed the accompanying condensed consolidated statement of financial position of Íslandsbanki hf. as at 30 September 2024, the condensed consolidated income statement and other comprehensive income, changes in equity and cash flows for the nine month period then ended, and notes to the condensed interim financial statements ("the Condensed Consolidated Interim Financial Statements"). Management is responsible for the preparation and presentation of this Condensed Consolidated Interim Financial Statements in accordance with IAS 34 Interim Financial Reporting and additional requirements in the Act on Annual Accounts, no. 3/2006; the Act on Financial Undertakings, no. 161/2002; and rules on accounting for credit institutions, where applicable. Our responsibility is to express a conclusion on these Condensed Consolidated Interim Financial Statements based on our review.

Scope of Review

We conducted our review in accordance with International Standard on Review Engagements 2410, Review of Interim Financial Information Performed by the Independent Auditor of the Entity. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying Condensed Consolidated Interim Financial Statements are not prepared, in all material respects, in accordance with IAS 34 Interim Financial Reporting and additional requirements in the Act on Annual Accounts, no. 3/2006; the Act on Financial Undertakings, no. 161/2002; and rules on accounting for credit institutions, where applicable.

Reykjavík, 23 October 2024

The Bank's authorised and issued share capital consists of 2,000 million ordinary shares with a par value of ISK 5 each. Islandsbanki bought back approximately 66.8 million own shares for ISK 6,790 million during the first nine months of 2024. As of 30 September 2024, the Bank's paid-in share capital totalled ISK 65,000 million, and the total stated share capital amounted to ISK 64,564 million. The Bank has a single class of ordinary shares that do not carry any rights to fixed income. The Annual General Meeting (AGM) for the 2023 operating year took place on 21 March 2024. During the AGM, shareholders approved the Board's proposal to distribute dividends of ISK 12,300 million, equivalent to ISK 6.26 per share (2023: ISK 6.15 per share). The dividends were paid on 2 April 2024.

Reconciliation of cash and cash equivalents Notes		
Cash on hand	3,370	4,252
Unrestricted balances with Central Bank	71,133	59,730
Bank accounts	7,699	35,235
Cash and cash equivalents at the end of the period	82,202	99,217

^{*}For further breakdown see the following page.

The Group has prepared its Consolidated Interim Statement of Cash Flows using the indirect method. The statement is based on the net profit after tax for the period and shows the cash flows from operating, investing and financing activities and the increase or decrease in cash and cash equivalents during the period.

^{**}Interest is defined as having been paid when it has been deposited into the customer's account and is available for the customer's disposal.

Consolidated Interim Statement of Cash Flows

Non-cash items included in profit for the period

	2024	2023
	1.1-30.9	1.1-30.9
Net interest income	(36,390)	(36,881)

1. Corporate information

Íslandsbanki hf., the parent company, was incorporated on 8 October 2008 and is a limited liability company domiciled in Iceland. The registered office is at Hagasmári 3, 201 Kópavogur, Iceland.

The Condensed Consolidated Interim Financial Statements for the period 1 January to 30 September 2024 comprise the financial statements of Íslandsbanki hf. ("the Bank" or "Íslandsbanki") and its subsidiaries together referred to as "the Group". The Bank's main subsidiaries are Íslandssjóðir hf. (Iceland Funds) and Allianz Ísland hf., additionally Íslandsbanki has control over eight other non-significant subsidiaries. All of the Bank's subsidiaries are wholly owned.

The Condensed Consolidated Interim Financial Statements were approved and authorised for issue by the Board of Directors and the CEO of Íslandsbanki hf. on 23 October 2024.

2. Basis of preparation

The Condensed Consolidated Interim Financial Statements have been prepared in accordance with the International Accounting Standard (IAS) 34 Interim Financial Reporting, as adopted by the European Union and additional requirements in the Act on Annual Accounts no. 3/2006, the Act on Financial Undertakings no. 161/2002 and rules on accounting for credit institutions.

The Condensed Consolidated Interim Financial Statements do not include all the information required for annual financial statements and should be read in conjunction with the audited Consolidated Financial Statements for the year 2023, as well as the unaudited Pillar 3 Report for the year 2023. Both are available on the Bank's website: www.islandsbanki.is.

The accounting policies are unchanged from those set out in Notes 3 and 62 in the Consolidated Financial Statements for the year 2023 except for the changes to accounting policies outlined below.

The following addition was made to the Group's accounting policies regarding the recognition of profit and loss of financial assets measured at fair value through profit or loss: For financial assets with significant uncertainty regarding the recoverability of interest, earned interest is not recognised.

The Condensed Consolidated Interim Financial Statements are presented in Icelandic króna (ISK), which is the functional currency of Íslandsbanki hf. All amounts presented in ISK have been rounded to the nearest million, except where otherwise indicated. At 30 September 2024 the exchange rate of the ISK against the USD was 134.60 and for the EUR 150.70 (year-end 2023: USD 136.20 and EUR 150.50).

The Group's management has made an assessment of the Group's ability to continue as a going concern and is satisfied that the Group has the resources to continue in business for the foreseeable future. Therefore, the Condensed Consolidated Interim Financial Statements have been prepared on a going concern basis.

Basis of measurement

The Condensed Consolidated Interim Financial Statements are prepared on a historical cost basis, except for the following assets and liabilities, which are measured at fair value: bonds and debt instruments, shares and equity instruments, investment property, short positions in listed bonds, derivative financial instruments, and certain debt issued by the Group.

Recognised financial liabilities designated as hedged items in qualifying fair value hedge relationships are measured at amortised cost adjusted for changes in fair value attributable to the risk being hedged.

3. Significant accounting estimates and judgements

In preparing these Condensed Consolidated Interim Financial Statements management has made judgements, estimates, and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income, and expenses. Management bases its judgements on previous experience and other factors that are considered reasonable under the circumstances, but actual results may differ from those estimates. Management continuously evaluates these judgements, estimates, and assumptions. Changes in accounting estimates are recognised when they occur.

As described in Note 3 in the Consolidated Financial Statements for the year 2023, key source of estimation uncertainty is the allowance for credit losses.

3. Significant accounting estimates and judgements (continued)

Impairment of financial assets

Note 62.3 in the Consolidated Financial Statements for the year 2023 contains a description of the Group's accounting policies for the impairment of financial assets. At the end of the third quarter of 2024, the following changes have been made.

The Group's Chief Economist provided a new macroeconomic forecast in September. The table below shows macroeconomic indicators from the new forecast that are used in the base case scenario.

Change in economic indicators %		Forecast 2024	Forecast 2025	Forecast 2026	Forecast 2027
Economic growth (YoY real GDP change)	5.0	0.3	1.2	2.5	2.5
Housing prices in Iceland (average YoY change)		10.7	7.0	6.1	3.5
Purchasing power (average YoY change)		(0.3)	1.4	1.7	1.5
ISK exchange rate index (average YoY change)		0.9	0.2	(1.5)	1.0
Policy rate, Central Bank of Iceland (average per year)	8.1	9.2	8.2	6.4	5.5
Inflation (average per year)	8.7	6.0	3.7	3.0	2.7
Capital formation (YoY real change)	1.6	2.3	0.2	3.8	2.9
thereof capital formation in industry	3.6	2.6	(0.9)	4.0	2.8

The All Risk Committee decides which weights of forward-looking scenarios best reflect uncertainty in economic conditions for borrowers and the ongoing uncertainty in global markets. The scenarios are usually weighted 25%-50%-25% (optimistic, base, pessimistic). However, it was determined appropriate to keep the weights at 20%-50%-30% at the end of the third quarter, as it was throughout last year, as this would best represent the probability-weighted average over all possible scenarios. Management used sensitivity analysis to determine the appropriate weights for the three scenarios. According to the analysis, a shift of 5% weight from the baseline to the pessimistic scenario would increase the impairment allowance by ISK 350 million, while a 5% shift from the baseline to the optimistic scenario would decrease the allowance by ISK 150 million.

In addition, the Group continues to make temporary changes to the impairment model due to seismic activity on the Reykjanes peninsula. The adjustments include classifying exposures amounting to ISK 0.9 billion (year-end 2023: ISK 5.2 billion) as Stage 2 instead of Stage 1 and applying higher haircuts to the values of collateral for these exposures. The Group also continues to apply a management overlay to the modelled ECL. Additional impairment allowance due to the seismic activity amounted to ISK 0.6 billion at 30 September 2024 (year-end 2023: ISK 1.7 billion). Exposure and additional impairment due to the seismic activity decreased during the first nine months of 2024 due to the purchase of the property company Þórkatla of residential housing within the urban area in Grindavík in accordance with Act no.16/2024 on the Purchase of Residential Property in Grindavík. In parallel, the Bank derecognised the loans and recognised a claim on Þórkatla instead. The Bank's claim on Þórkatla is classified as bonds and debt instruments measured at fair value through profit and loss and does therefore not contribute to the impairment allowance. For further information see Note 17.

4. Operating segments

Segment information is presented in accordance with the Group's management and internal reporting structure. The segments' operating results are reported to the Board of Directors and the Chief Executive Officer, who are responsible for allocating resources to the reportable segments and assessing their financial performance.

An operating segment is a distinguishable component of the Group, for which discrete financial information is available, that engages in business activities from which it may earn revenues and incur expenses, including revenues and expenses that relate to transactions with any of the Group's other components. Each operating segment is engaged in providing products or services which are subject to risk and return that are different from those of other operating segments. The accounting policies for the reportable segments are in line with the Group's accounting policies. The Group operates mainly in the Icelandic market.

The Bank has three main business segments: Personal Banking, Business Banking, and Corporate & Investment Banking. Operating segments pay and receive interest to and from Treasury to reflect the allocation of capital, funding costs, and the relevant risk premium. Capital allocation to the business units is based on the Pillar 1 regulatory capital requirement, the Pillar 2-R capital requirement calculated according to the Bank's Internal Capital Adequacy Assessment Process (ICAAP) and the combined buffer requirement as stipulated in the Act on Financial Undertakings no. 161/2002. Income tax and bank tax with breakdown for each segment is according to the current tax rates.

The Group comprises the following operating segments.

Personal Banking

Personal Banking provides comprehensive financial services to individuals, such as lending, savings and payments. Íslandsbanki's customers are increasingly taking care of their day-to-day banking via digital solutions such as apps, the online bank and the secure web chat. Customers can also visit the Bank's efficient branch network for comprehensive consultancy services and contact the contact centre.

Business Banking

Business Banking provides small and medium-sized enterprises (SMEs) with comprehensive financial services and Ergo, the Bank's asset financing service, is also part of the division. Business Banking serves customers in business centres and branches close to their business. Via online banking and the app, customers have full overview of their business and day-to-day operations are easy to manage.

Corporate & Investment Banking

Corporate & Investment Banking provides universal banking services to large companies, municipalities, institutional investors, and affluent individuals. Services include customised products and services to customers including lending and advisory, risk management, brokerage, and private banking services. The division is sector-focused, building and maintaining relationships with key customer segments within Iceland. Outside of Iceland, Íslandsbanki has a special focus on the North Atlantic seafood industry, leveraging its expertise in the domestic market and global contacts.

Treasury and Proprietary Trading

Treasury is responsible for funding the Bank's operations and for managing the internal pricing framework. It is also responsible for the Bank's balance sheet management and for relations with debt investors, financial institutions, stock exchanges, and rating agencies. Equity that is not allocated to business units sits within Treasury. Proprietary Trading includes equity and debt investments in the trading book and the banking book.

Cost centres

Cost centres comprise the CEO's office (Human Resources & Internal Services, Legal, Marketing & Communications, and Strategy & Sustainability), Digital & Data, Risk Management, Compliance, and Finance excluding Treasury and Proprietary Trading. Group Internal Audit is also included in cost centres, however, it is independent from the Bank and the Chief Audit Executive reports directly to the Bank's Board of Directors.

Subsidiaries, eliminations and adjustments

Subsidiaries include Íslandssjóðir hf. (Iceland Funds), Allianz Ísland hf. and other less significant subsidiaries. All inter-company eliminations are included in the column "Eliminations & adjustments".

Following is an overview showing the Group's performance with a breakdown by operating segments.

12. Administrative fines

In the autumn of 2022, the Financial Supervisory Authority of the Central Bank of Iceland (FSA) conducted an onsite inspection of the Bank's anti-money laundering (AML) measures as part of its supervision of regulatory compliance in the banking sector. The FSA identified certain shortcomings in relation to the Bank's AML measures. On 31 May 2024 the Bank announced that the Board of Directors accepted the FSA's offer to conclude the matter with a settlement agreement (the Settlement Agreement).

The Settlement Agreement provides that the Bank accepts the FSA's conclusion that the Bank's shortcomings were many and related to various fundamentals in the Bank's AML control framework. Further, the breaches were deemed significant and to some extent a reiteration from previous FSA observations in 2021. By entering into the Settlement Agreement, the Bank committed to carry out appropriate remedial actions. The Bank has strengthened its regulatory infrastructure and overall governance.

Under the terms of the Settlement Agreement, the Bank agreed to pay a fine in the amount of ISK 570 million. The Bank recognised a provision of ISK 100 million in connection with the preliminary findings from the FSA's inspection of the Bank's AML measures in the 2023 Consolidated Financial Statements and in the second quarter of 2024 a charge of ISK 470 million was recorded in relation to this matter.

In the second quarter of 2023 a charge of ISK 860 million was recorded in relation to the Settlement Agreement with the FSA in relation to the Bank's execution of the offering by the Icelandic State of a 22.5% stake in the share capital of Íslandsbanki that took place in March 2022.

13. Net impairment on financial assets

8 604	(422)
	1.7-30.9
	23 2024 0.9 1.7-30.9

14. Income tax expense

Recognised income tax is based on applicable tax laws. The income tax rate for legal entities in 2024 is 21% (2023: 20%). Special financial activities tax is calculated as 6% of the Bank's taxable profit exceeding ISK 1 billion in accordance with the Act on Financial Activities Tax no. 165/2011. The effective income tax rate in the Group's income statement for the nine months ended 30 September 2024 is 29.2% (nine months ended 30 September 2023: 28.9%).

			2024	2023
			1.1-30.9	1.1-30.9
Current tax expense excluding discontinued operations			6,605	5,880
Special financial activities tax			1,780	1,678
Adjustments in prior year's calculated income tax			(12)	(18)
Changes in deferred tax assets and deferred tax liabilities			(1,005)	(79)
Income tax recognised in the income statement			7,368	7,461
Income tax recognised in other comprehensive income*			(255)	(1,130)
*Comparative figures have been changed.				
	2024		2023	
	1.1-30.9		1.1-30.9	
Profit before tax	25,241		25,793	
Income tax calculated on the profit for the period	5,301	21.0%	5,158	20.0%
Special financial activities tax	1,780	7.1%	1,678	6.5%
Adjustments in prior year's calculated income tax	(12)	0.0%	(18)	(0.1%)
Income not subject to tax	(388)	(1.5%)	(57)	(0.2%)
Non-deductible expenses	711	2.8%	739	2.9%
Other differences	(24)	(0.1%)	(39)	(0.2%)
Effective income tax expense	7,368	29.2%	7,461	28.9%

The Bank is taxed jointly with its subsidiary Íslandssjóðir hf. (Iceland Funds).

15. Earnings per share

	Continued operations		Discontinued operations		Profit for the period	
	2024 2023	2024	2023	2024	2023	
	1.1-30.9	1.1-30.9	1.1-30.9	1.1-30.9	1.1-30.9	1.1-30.9
Profit attributable to shareholders of the Bank	17,873	18,332	90	25	17,963	18,357
Weighted average number of outstanding shares	1,944	1,994	1,944	1,994	1,944	1,994
Basic earnings per share (ISK)	9.19	9.19	0.05	0.01	9.24	9.21

The Group's basic and diluted earnings per share are equal as the Group has not issued any options, warrants, convertibles, or other financial instruments that dilute earnings per share (nine months ended 30 September 2023: none).

17. Fair value information for financial instruments

Financial instruments carried at fair value

The fair value of a financial instrument is the transaction price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Where a market price is not readily available, the Group applies valuation techniques based on estimates and assumptions that are consistent with that which market participants would use in setting a price for the financial instrument.

The following table shows financial instruments carried at fair value at 30 September 2024 categorised into three levels of fair value hierarchy that reflect the type of inputs used in making the fair value measurements. The different levels have been defined as follows:

- Level 1: Inputs that are quoted prices (unadjusted) in active markets for identical assets or liabilities that the Group can access at the measurement date.
- Level 2: Valuation techniques based on observable inputs other than the quoted prices included in Level 1, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3: Valuation techniques based on significant unobservable inputs, e.g. internal assumptions.

At 30 September 2024	Level 1	Level 2	Level 3	Total

Transfers from loans to customers*	2,160	-
Net gain on financial instruments recognised in profit or loss	-	85
Fair value at 30 September 2024	2,160	2,143

*Transfers from loans to customers is due to the Bank's claim on the property company Þórkatla. Þórkatla purchased residential housing within the urban area in Grindavík in accordance with Act no. 16/2024 on the Purchase of Residential Property in Grindavík in the first nine months of 2024. In parallel, the Bank derecognised the loans and recognised a claim on Þórkatla instead. Since there is significant uncertainty regarding the recoverability of interest, earned interest is not recognised on the claim on Þórkatla. The nominal value, including accrued interest, of the claim was ISK 3.360 million at 30 September 2024. The claim on Pórkatla is highly sensitive to changes in fair value measurement inputs and is therefore included in the sensitivity analysis for Level 3 financial instruments. A significant unobservable input used in the valuation of the claim is the estimated value of residential housing in Grindavík purchased by Þórkatla.

	Bonds and	Shares and

Fair value at 31 December 2023	-	1,902

Sensitivity analysis for Level 3 financial instruments

The valuations of Level 3 financial instruments are in general uncertain and subject to various factors. The favourable and unfavourable scenarios can be considered as being likely movements in valuation within a year. The very favourable and very unfavourable scenarios are considered less likely, but not impossible and are not worst-case scenarios for some of the assets.

The following table illustrates how profit before tax would have been affected if one or more of the inputs for the fair value measurement were changed for Level 3 assets that are highly sensitive to changes in fair value measurement inputs.

	30.9.2024	31.12.2023
Very favourable	2,655	904
Favourable	1,642	217
Unfavourable	(1,015)	(187)
Very unfavourable	(1,760)	(217)

18. Financial instruments not carried at fair value

Assets

The fair value of "Loans to customers" may differ from their net carrying amount because the interest rates they carry may not reflect the interest rates that similar new loans would carry. The fair value is estimated by subtracting from or adding to the net carrying amount of the loans the discounted interest rate difference calculated from the reporting date until the next interest reset or maturity, whichever comes first. Since the interest rate difference is estimated using internal models these assets are classified as Level 3.

For "Cash and balances with Central Bank", "Loans to credit institutions" and "Other financial assets" the fair value is adequately approximated by the carrying amount as they are short-term in nature. They are thus classified as Level 2.

Liabilities

The fair value of a financial liability with a demand feature, such as a demand deposit, is not less than the amount payable on demand, discounted from the first date that the amount could be required to be paid. Most deposits are on demand or carry floating interest rates and as such their carrying amount is considered a good approximation of their fair value. The fair value for longer term fixed rate deposits is calculated with a duration approach, using the difference in each liability's current interest rate from the rate that a similar deposit would carry today. All deposits are classified as Level 2 based on the use of observable market interest rates to estimate the fair value.

Observed market value is used for the fair value of "Debt issued and other borrowed funds" where it is available. Issued bonds and bills with quoted market prices are classified as Level 1. If there is no quoted market price the fair value of the debt is valued in the same manner as deposits if it carries a fixed rate. If the debt carries a floating rate its fair value is estimated by comparing the margin with the Group's current funding premium on similar debt. These liabilities are classified as Level 2. The funding premium is based on the interest margin in the Group's issued papers including covered bonds, commercial papers as well as foreign currency denominated bonds.

Other financial liabilities mainly include unsettled securities transactions and payments due to leasing contracts and they are classified as Level 2 since their value is not observable from active market prices. Due to the short-term nature of these liabilities their carrying amount is considered a good approximation of their fair value.

The following table shows the fair value measurement and classification of the Group's assets and liabilities not carried at fair value. The different levels are defined in Note 17.

19. Offsetting financial assets and financial liabilities

The following tables show reconciliation to the net amounts of financial assets and financial liabilities which are subject to offsetting, enforceable master netting agreements and similar agreements.

At 30 September 2024, and at year-end 2023, no netting occurred between financial assets and liabilities subject to enforceable master netting agreements and comparable arrangements, resulting in no offsetting.

Derivatives	30.9.2024	31.12.2023
Net financial assets	6,014	5,776
Amounts not set off but subject to master netting arrangements and similar agreements	(4,799)	(4,404)
- Financial liabilities	(1,339)	(715)
- Cash collateral received	(2,966)	(3,589)
- Financial instruments collateral received	(494)	(100)

The Group uses derivatives to hedge currency exposure, interest rate risk in the banking book as well as inflation risk. The Group carries relatively low indirect exposure due to margin trading with clients and the Group holds collaterals for possible losses. Other derivatives in the Group held for trading or for other purposes are insignificant.

Short positions are in Icelandic Government bonds and bonds issued by municipalities, banks, and public companies. As a primary dealer the Group has access to securities lending facilities provided by the Central Bank and other issuers. Majority of the securities lending facilities have a maturity of less than a year.

The Group applies hedge accounting only with respect to certain EUR denominated interest rate swaps, whereby the Group pays floating rate interest and receives fixed rate interest. The interest rate swaps are hedging the exposure of changes in the fair value of certain fixed-rate EUR denominated bonds (see Note 32) arising from changes in EURIBOR benchmark interest rates. The Group applies fair value hedge accounting to the hedging relationships and for the purpose of evaluating whether the hedging relationship is expected to be highly effective, the Group assumes that the benchmark interest rate is not altered as a result of IBOR reform. At 30 September 2024 the total fair value of the interest rate swaps in the hedging relationship was positive and amounted to ISK 1,607 million (year-end 2023: negative ISK 39 million) and their total notional amount was ISK 90,420 million (year-end 2023: ISK 45,150 million).

25. Investments in associates

		30.9.2024	31.12.2023
Reiknistofa bankanna hf., an IT service centre company, Dalvegur 30, 201 Kópavogur	Iceland	30.1%	30.1%
Norðurturninn hf., a rental company of commercial real estate, Borgartún 26, 105 Reykjavík	Iceland	43.3%	43.3%

Norðurturninn hf. shares are divided into two categories, Class A shares and Class B shares. Class B shares hold all the voting rights and receive all dividends up to ISK 3,726 million (CPI-linked, based on the CPI in September 2024). After Class B shareholders have received that amount the class is then suspended, and Class A shares receive all the voting rights and the rights to dividend payments. Íslandsbanki owns 43.3% of Class B shares and 65.0% of Class A shares. Norðurturninn owns the real estate Hagasmári 3, where the Bank is the principal lessee and rents over half the building for its headquarters.

26. Investment property

Transfer from property and equipment	1,194
Additions during the period	86
Fair value changes	820
At 30 September 2024	2,100

Kirkjusandur 2, the Bank's former headquarters, was reclassified from property and equipment to investment property during the first quarter of 2024. The Group measures investment property at fair value. The fair value measurement of investment property uses significant unobservable inputs and is thus classified as Level 3 in the fair value hierarchy. The fair value of investment property is based on external valuations from independent valuers in addition to internal assumptions. Significant unobservable inputs used in the valuation of investment property are the estimated sale value per square metre of building rights, estimated demolition costs and a discount rate.

27. Property and equipment

Pledged assets against liabilities	391,822	471,967
Pledged assets against Covered Bonds held by the Bank	(123,401)	(171,350)
Loans to customers pledged as collateral in repurchase agreements	-	23,656
Pledged assets against liabilities on balance	268,421	324,273

The Group has pledged assets against the issuance of Covered Bonds under Icelandic law, which are pledged on a pool of consumer mortgage loans. The Group owns Covered Bonds for its own use which accounts for a portion of the pledged assets. The carrying amount of these bonds at 30 September 2024 was ISK 103,163 million (year-end 2023: ISK 117,476 million).

The Group has also pledged assets with the Central Bank to ensure the clearing of the Icelandic payment system as well as other contracts with the Central Bank. Moreover, it has pledged cash in foreign banks and financial institutions, mainly as collateral for trades under ISDA agreements to hedge market risk.

Other borrowed funds					11,638	28,178
Debt issued and other borrowed funds					380,814	417,573

The Group repurchased own bonds during the period amounting to ISK 76,088 million (2023: ISK 95,075 million).

The Group has issued additional bonds for its own use, e.g. for the purpose of securities lending and repurchase agreements. These bond amounts are not included in the total.

^{*}The Group applies hedge accounting to this bond issuance and uses certain EUR denominated interest rate swaps as hedging instruments (see Note 22). The interest rate swaps are hedging the exposure of the Group's changes in the fair value of this fixed-rate EUR denominated bond arising from changes in EURIBOR benchmark interest rates. The Group applies fair value hedge accounting to the hedging relationships and for the purpose of evaluating whether the hedging relationship is expected to be highly effective, the Group assumes that the benchmark interest rate is not altered as a result of IBOR reform. At 30 September 2024 the total carrying amount of the bond issuance amounted to ISK 92,154 million and included in the amount are negative fair value changes amounting to ISK 964 million.

^{**}These bond issuances are classified as being designated as at fair value through profit or loss. At 30 September 2024 the total carrying amount of the bonds amounted to ISK 33,134 million and included in the amount are fair value changes amounting to ISK 399 million.

Total		100.0%	100.0%

At 30 September 2024 the number of shareholders of the Bank was 10,766 (year-end 2023: 11,551) where 89.8% of the Bank's shares were owned by domestic parties and 10.2% by international investors (year-end 2023: 89.3% domestic parties and 10.7% international investors). The Bank's employees, board members and related parties of the employees and board members, held 0.14% of shares in the Bank (year-end 2023: 0.14%). Treasury shares amounted to 87.2 million shares, representing 4.4% of the issued share capital (year-end 2023: 20.2 million shares, or 1.0% of the issued share capital).

Beneficial owners

For domestic pension funds, domestic fund management entities and foreign shareholders, the board of directors of the relevant entity is considered as the beneficial owner. Information on the holdings of individual funds is published jointly under the name of their management company.

37. Related party

The Board of Directors and key management personnel of the Bank, the Icelandic State Financial Investments (ISFI) and subsidiaries of the Bank, close family members of individuals referred to herein and legal entities controlled by them, are defined as related parties. The Group's associates are also defined as related parties.

Íslandsbanki has a related party relationship with the Icelandic Government as the largest shareholder with significant influence over the Group. The shares are administered by ISFI. As a result, the Icelandic Government and the ISFI are defined as related parties. The Group has applied the partial exemption for government-related entities, as described in IAS 24.

The Group's products and services are offered to the Icelandic Government and government-related entities in competition with other vendors and under generally accepted commercial terms. In a similar manner the Group entities purchase products and services from government-related entities under generally accepted commercial terms. Transactions with related parties were made in the ordinary course of business on substantially the same terms, including interest rates and collateral, as those prevailing at the time for comparable transactions with third party counterparties.

The following tables show the Group's balances and transactions with related parties.

At 30 September 2024 a total of ISK 11 million (year-end 2023: ISK 3 million) were recognised as Stage 1 expected credit losses of balances with related parties. Expected credit losses of balances with related parties are mostly related to loans to associated companies. No share option programmes were operated during the period.

38. Contingencies

The Bank and its subsidiaries are parties to legal proceedings and regulatory matters that arise out of its normal business operations. Apart from the matters described below, the Group considers that none of these matters are material.

Contingent liabilities

Borgun hf. - Landsbankinn hf.

Borgun hf. (currently Teya Iceland hf.), a former subsidiary of Íslandsbanki, is a payment acquirer and issuing processor. Landsbankinn hf. sold its 31.2% stake in Borgun hf. in late 2014. Landsbankinn claims that Borgun's management did not disclose all available information that might have affected the value of Borgun during the sales process, namely the value of its stake in Visa Europe which was sold to Visa International shortly after the Borgun sale. In order to reclaim the alleged loss, Landsbankinn filed a lawsuit against Borgun and others on 12 January 2017, claiming the right to damages for having been deprived of the true value of the stake involved in the sale. Landsbankinn does not quantify the claim, but its estimate of the lost profit from having sold its shares in Borgun is approximately ISK 1,930 million.

On 11 March 2020, the Bank signed an agreement to sell its 63.47% stake in Borgun hf. to SaltPay Co Ltd. and concluded the sale on 7 July 2020. In the agreement the Bank undertook to reimburse 63.47% of losses incurred by Borgun or the buyer as a result of an unfavourable outcome in the Landsbankinn case, however such reimbursement was never to exceed the Bank's share in the purchase price.

On 27 April 2023 a panel of three judges of the District Court of Reykjavík rendered a judgement and dismissed the claims made by Landsbankinn against all defendants. Landsbankinn has appealed the judgement to the Court of Appeal. The Bank has not recognised a provision in relation to this matter.

105 Miðborg slhf. – ÍAV hf.

In February 2021 the alternative investor fund 105 Miðborg slhf., operated by Íslandssjóðir hf. (Iceland Funds hf.), a wholly owned subsidiary of the Bank, terminated its contractor agreement with ÍAV hf., a contractor that had been retained for a real estate project at Kirkjusandur in the centre of Reykjavík. The main reason for the termination was the alleged non-performance and delays in the construction of one building on the premises. The contractor, ÍAV, has claimed approximately ISK 3,829 million in damages plus late payment interest and legal costs from 105 Miðborg and Iceland Funds for the alleged unlawful termination. The suit was filed on 11 May 2021 at the District Court of Reykjavík. Additionally, 105 Miðborg has filed a case against ÍAV claiming approximately ISK 3,878 million in damages plus late payment interest and legal costs due to alleged delays and significant breaches of contract. The Group owns an 8.25% stake in 105 Miðborg. The Group has not recognised a provision in relation to this matter.

The Consumers' Association of Iceland

In December 2021 three customers, sponsored by the Consumers' Association of Iceland, commenced litigation against the Bank, demanding that certain provisions of their residential mortgages, governing variable interest rates, be deemed illegal and unenforceable and demand the repayment of any overpaid interest.

Firstly, two of the cases were brought by customers owing CPI-linked mortgages that contain a certain interest resetting provision that the Supreme Court found in its ruling on case no. 623/2016 could not be used by the Bank to reset interest rates. Following that judgement, the Bank repaid its customers any interest that the Bank had charged in excess of the originally agreed interest rate and returned the affected loans to their original interest rates. In the suits now filed the customers maintain that instead of the originally agreed interest rates, their loans should incur interest rates pursuant to article 4 of Act no. 38/2001 on Interest and Price Indexation. An unfavourable finding by the courts may have an influence on the Bank's portfolio of loans and fully paid loans that contained the resetting provision, disputed in case no. 623/2016. The Bank estimates that the financial impact of an unfavourable ruling in an adverse scenario could amount to around ISK 2 billion. On 25 May 2023, the District Court of Reykjanes rendered a judgement in one of these cases and dismissed all claims that were made against the Bank. The plaintiff has appealed the judgement to the Court of Appeal.

38. Contingencies (continued)

The Consumers' Association of Iceland (continued)

Secondly, a case has been brought against the Bank by a customer owing a non-index linked mortgage bearing variable interest rates. The plaintiff maintains that the terms governing the variable interest rates are invalid and may not be used by the Bank as basis for setting interest rates, and that therefore the originally agreed interest rate should remain fixed during the term of the loan. During the proceedings, the District Court decided to seek an advisory opinion from the EFTA Court. On 23 May 2024, the EFTA Court gave its advisory opinion, providing the Court's interpretation of certain provisions of the Mortgage Credit Directive no. 2014/17/EU (the Mortgage Credit Directive) and Directive 93/13/EEC on unfair terms in consumer contracts (the Unfair Terms Directive). The Court offered guidance on requirements under the directives for the clarity, accessibility, objectivity, and verifiability of contract terms and information provided to consumers. The EFTA Court concluded that it is up to Icelandic courts to determine whether these requirements are met and to assess the impact on the underlying contracts if they are not met. The Bank believes that the terms of its mortgages and other loan contracts comply with these requirements, as well as with Icelandic legislation. Furthermore, the increases in the variable interest rates set by the Bank on the disputed mortgage have been less than changes on policy rates during the same period. Following the publication of the EFTA Court's advisory opinion, the court case will continue in the Icelandic courts. It is the Bank's preliminary assessment of the potential impact of an adverse ruling on the Bank's loan portfolio with the same interest rate provision that the Bank's financial loss, taking different scenarios into account, could amount to around ISK 15 billion. The preliminary assessment does not include an assessment of the impact on the Bank's interest rate risk should an adverse final court ruling be that the initial contractual interest rates should be applied throughout the duration of the respective loans. Such a ruling, which the Bank regards as unlikely, would significantly increase the Bank's interest rate risk and could have a considerable negative financial impact on the Bank in times of increased market interest rates.

It is disputed in all three cases whether the terms of the Bank's mortgages, and the method used by the Bank to set variable interest rates, is in compliance with the Act on Mortgage Lending to Consumers no. 118/2016. That act is in this respect similar to the terms of Act no. 33/2013 on Consumer Credit. An unfavourable ruling in this case may affect all indexed and non-index linked mortgages bearing variable interest rates, as well as any loans bearing fixed interest rates to be reset on a predefined date.

The Bank believes that the claims of the plaintiffs are unfounded and has not recognised a provision in relation to this matter.

EC Clear ehf.

In August 2021 EC Clear ehf., a former owner of a payment processing company, filed a suit jointly against the Bank and four other financial institutions claiming damages in the amount of ISK 923 million plus interest from June 2013, resulting from a breach of competition law that allegedly took place during the period from 2003 to 2013. This was the sixth time the case had been brought before the courts for this purpose, after previous cases had been dismissed. On 30 September 2022 the District Court of Reykjavík dismissed the case. On 10 January 2023 the Court of Appeal partly reversed the dismissal and ordered the District Court to hear the case in substance. The hearing of the case has not been decided. The Bank has not recognised a provision in relation to this matter.

39. Events after the reporting period

No events have arisen after the reporting period that require amendments or additional disclosures in the Condensed Consolidated Interim Financial Statements for the third quarter of 2024.

40. Risk management

Risk governance

The Group is exposed to various risk factors and managing these risks is an integral part of its operations. More information about the Group's risk management and risk assessment processes is available in the unaudited Pillar 3 2023 Report, which is available on the Bank's website: www.islandsbanki.is.

41. Credit risk

Credit risk is defined as current or prospective risk to earnings and capital arising from an obligor's potential failure to meet the terms of any financial contract with the Group.

Credit concentration risk is the significantly increased risk that is driven by common underlying factors, e.g. industrial sector, economy, geographical location, type of financial instrument, or due to connections or relations among counterparties. This includes exposures to parties under common control and significant exposures to groups of counterparties whose likelihood of default is driven by common underlying factors. Credit risk arises principally from loans and advances to customers and other banks but also from balances with the Central Bank and off-balance sheet items such as financial guarantees, loan commitments and derivatives.

The Group has policies and procedures dedicated to accepting, measuring, and managing credit risk. The objective of the Group's credit risk management is to achieve an appropriate balance between risk and return and to minimise potential adverse effects of credit risk on the Group's financial performance.

A thorough analysis of the counterparty's financial standing, analysis of past and estimated future cash flows as well as the borrower's general ability to repay its obligations forms the basis for all credit decisions. The Group structures the levels of credit risk it undertakes by placing limits on the amount of risk accepted in relation to one borrower, groups of borrowers, countries and industry segments. The Group measures and consolidates its credit risk for each counterparty or group of connected clients in accordance with internal and external criteria of connection between parties.

The Group employs a range of policies and practices to mitigate credit risk. The most traditional of these is the taking of security in borrower's assets. The principal collateral types for loans are properties, vehicles, equipment, vessels and securities. When applicable, other credit risk mitigants are employed.

42. Maximum credit exposure and collateral

The Group's credit risk exposure comprises both on-balance sheet and off-balance sheet items. Maximum exposure to credit risk for on-balance sheet assets is the net carrying amount as reported in the Consolidated Statement of Financial Position. The maximum exposure for off-balance sheet items is the amount that the Group might have to pay out against financial guarantees and credit commitments, less provisions that have been made because of these items.

Collateral and other credit mitigants vary between types of obligors and credit facilities. For loans to individuals the principal collateral taken is residential property against mortgages. In the case of corporate entities the Group takes a charge over assets such as real estate, vessels, cash, and securities as well as other collateral including accounts receivables, inventory, vehicles, and equipment. Loans to government entities and to municipalities are more often than not unsecured.

In some cases the Group uses guarantees as a credit enhancement but since guarantees effectively transfer credit risk from one counterparty to another they do not represent a reduction in maximum exposure to credit risk. Exempt from this are Government guarantees issued in response to the COVID-19 pandemic which are shown under other collateral. Of these, ISK 326 million are subject to 100% Government guarantee and ISK 433 million to 85% Government guarantee. Covenants in loan agreements are also an important credit enhancement but do not reduce maximum credit exposure.

Valuation of collateral is based on market price, official valuation for tax purposes or expert opinion of the Group's employees, depending on availability. In the case of fishing vessels the associated fishing quota is included in the valuation. The total value of pledged assets can be higher than the cover indicates. For capital leases the Group remains the owner of the leased object.

The industry breakdown under loans to customers shows the credit exposure by industry classification. The breakdown follows an internal industry classification which is based on the Icelandic ISAT2008 that derives from the European NACE Rev. 2 classification standard.

The following table shows the maximum exposure to credit risk by collateral held against those exposures that are subject to IFRS 9 impairment requirements.

Maximum credit exposure for off-balance sheet items reflect the maximum amount, not taking into account the Group's ability to reduce its loan commitments before the current undrawn amount is fully utilised by the customer.

43. Credit quality of financial assets

The following tables provide the gross carrying amount of loans and credit risk exposure on loan commitments and financial guarantees. Amounts are broken down by risk class and the method by which their respective credit loss allowances (ECL) are calculated, i.e. Stage 1, 2 and 3

The Group uses internal rating models to assess the default probability of corporate and retail customers. The models assign each customer to one of ten risk classes. One risk class is for customers in default (risk class 10), and nine risk classes are for performing customers (risk classes 1-9). Risk classes are assigned on customer level and not facility level.

The rating of corporate customers is based on a company's most recent financial statements, together with a qualitative assessment of its management, market position and industry sector.

For retail customers the Group uses two different statistical rating models. One model is for individuals and another is for small companies with a total exposure to the Group of less than ISK 150 million. These models are behavioural scoring models and use information about a customer's payment history, amount of debt and deposits, and demographic variables to assess the probability that a customer will default on any of his obligations within 12 months of the rating assessment.

Risk classes 1-4 represent low risk, risk classes 5-6 moderate risk, risk classes 7-8 increased risk, risk class 9 high risk, and risk class 10 represents customers that are in default. Unrated are loans that are yet to be rated.

Further information on the risk classes, including the mapping from risk classes to the probability of default, can be found in Section 4.2.2 of the unaudited Pillar 3 2023 Report.

The same customer can have loans and off-balance sheet commitments in Stages 1 and 2 simultaneously. However, if a customer has an exposure in Stage 3 then all other loans and commitments are classified as Stage 3 as well.

At 30 September 2024

Loans to customers:	Stage 1	Stage 2	Stage 3	Total

44. Forbearance

When restructuring or modification measures are believed to be more appropriate than collection procedures, the Group offers several debt relief measures and restructuring frameworks for customers in financial difficulties. These forbearance measures include temporary payment holidays, extension of loan terms, capitalisation of arrears, and waiving of covenants.

The relationship between forbearance and stages is discussed in Note 62.3 in the Consolidated Financial Statements for the year 2023.

Once an asset has been classified as forborne, it will remain forborne for a minimum 24-month probation period. In order for a loan to be reclassified out of the forborne category, the customer has to meet all of the following criteria:

- All of the customer's facilities have to be considered performing during the probation period; and
- The customer does not have any contract that is more than 30 days past due; and
- The probation period of two years has passed from the date of the forbearance event; and
- Regular payments of more than an insignificant amount of principal or interest have been made during at least half of the probation period.

Stage 1

Large exposures disclosure

When the Group's total exposure to a group of connected clients is 10% or higher of the Group's Tier 1 capital it is considered a large exposure. Both on-balance sheet and off-balance sheet items from all types of financial instruments are included in the exposure as defined by EU regulation no. 575/2013 on prudential requirements for financial undertakings (CRR). The Group has internal criteria that define connections between clients. These criteria reflect the Group's interpretation of CRR, where groups of connected clients are defined.

The exposure is evaluated both before and after credit risk mitigating effects according to the aforementioned regulation. After mitigating effects, the Group had three large exposures at 30 September 2024 (year-end 2023: two). No large exposure is above the maximum 25% large exposure limit set by the law.

The Group's largest exposure before eligible credit risk mitigating effects is the Icelandic Government. Largest part of the exposure is due to Icelandic Government Bonds in the Group's liquidity portfolio.

At 30 September 2024

Groups of connected clients:	Before	After
Group 1	95%	6%
Group 2	11%	11%
Group 3	10%	10%
Group 4	10%	10%

At 31 December 2023

Groups of connected clients:	Before	After
Group 1	76%	2%
Group 2	15%	15%
Group 3	10%	10%

46. Liquidity risk

The Group defines liquidity risk as the risk of not being able to fund its financial obligations or planned growth, or only being able to do so substantially above the prevailing market cost of funds.

The Group's main source of funding is customer deposits. Treasury is responsible for the Bank's funding and liquidity management in line with internal and regulatory limits and policies. Treasury manages the Bank's intraday liquidity. Risk Management, as the second line of defence, is responsible for independent reporting on the liquidity position to internal and external stakeholders and for providing a holistic view of liquidity risk on a consolidated basis.

47. Liquidity coverage and net stable funding ratio

Key measures for the assessment of liquidity risk are the Liquidity Coverage Ratio (LCR) and Net Stable Funding Ratio (NSFR). The Central Bank of Iceland, which is the main supervisory authority regarding liquidity risk, has incorporated the LCR and the NSFR based on the CRD IV standards into the rules on liquidity ratios and the rules on funding ratios. In addition, the Group complies with the FSA's guidelines no. 2/2010 on best practices in liquidity management and the liquidity coverage ratio rules no. 1520/2022.

As of January 2023 rules no. 1520/2022 took effect. The minimum LCR ratio that the Group is required to maintain remains 100% for the total LCR. A new requirement for LCR in EUR is 80% and in ISK the requirement is 50%. There is no longer any minimum requirement for the aggregated position in foreign currencies. The Group is required to maintain a 100% minimum NSFR ratio.

The following tables show the NSFR and the LCR for the Group at 30 September 2024 and year-end 2023.

Net stable funding ratio				30.9.2024	31.12.2023
For all currencies				126%	124%
Liquidity coverage ratio				30 9 2024	31.12.2023
For all currencies				223%	195%
ISK				154%	115%
EUR				621%	663%

48. Maturity analysis of financial assets and financial liabilities

The following tables show the maturity profile of the Group's financial assets and the undiscounted cash flows of its financial liabilities. Maturity classification of assets is based on contractual maturity.

Bonds and debt instruments are based on contractual maturity and therefore do not represent their estimated liquidation time.

The tables show undiscounted contractual payments of principal and interest for the Group's financial assets and liabilities. Thus, the total figures for each asset or liability class are higher than the respective balance sheet amount. Cash flows for payments of unknown nature, such as for floating rate, CPI-linked or foreign currency denominated instruments, are based on internal yield curves and forecasts.

For dated financial assets or liabilities the amounts are grouped into maturity buckets according to contractual maturities of principal and estimated contractual payments of interest. For demand deposits or other non-dated liabilities, the figures are grouped according to the first possible required payment date.

The following tables also show the contractual cash flow of the Group's derivatives, i.e. derivatives that have a negative and a positive carrying amount at the reporting date. For derivatives settled on a gross basis, the cash flow for both legs of the derivative is shown, since netting cannot be applied upon settlement.

In 2024, the Group updated its methodology for the maturity analysis of financial assets. Financial assets are now presented as undiscounted contractual payments of principal and interest, instead of discounted amounts including impairment charges as presented on the balance sheet. Comparative figures have been changed to reflect the updated methodology.

^{*}In 2024, the Group updated its methodology for the maturity analysis of financial assets. Financial assets are now presented as undiscounted contractual payments of principal and interest, instead of discounted amounts including impairment charges as presented on the balance sheet. Comparative figures have been changed to reflect the updated methodology.

Off-balance sheet liabilities

Note 42 Maximum credit exposure and collateral shows the amount of contractual obligations of off-balance sheet liabilities that the Group has taken towards customers, either by committing to lend out money in the future or as third party guarantees. The amounts shown reflect the maximum amount, not taking into account the Group's ability to reduce financial guarantees and credit commitments before the current undrawn amount is fully utilised by the customer. These obligations are all categorised as on demand since contractually, on a case-by-case basis, the Group could be required to fulfil these obligations instantaneously.

49. Market risk

The Group defines market risk as the current or prospective risk to earnings and capital arising from adverse movements in the level or volatility of prices of market instruments, such as those that arise from changes in interest rates, foreign exchange rates, equity prices, CPI-indexation, and commodity prices. Sources of market risk are imbalances in the Group's balance sheet and open positions in bonds, currencies, and equities. Derivative contracts are also potential sources of market risk (see Note 22).

Market risk within the Group can broadly be split into two categories, trading book and banking book (or non-trading book). The trading book includes market risk exposures related, directly or indirectly, to the Group's short- and medium-term trading in securities, currencies and other capital market instruments and derivatives. All financial assets and liabilities in the trading portfolio are recognised at fair value and all resulting changes are immediately reflected in the income statement. The banking book includes market risk exposures related to securities held for long-term investment purposes, unlisted securities or holdings in subsidiaries or affiliates. A large part of the banking book market risk is due to mismatches in the composition of assets and liabilities, for example with respect to currencies, interest rates, CPI-indexation or other factors that can affect the Group's earnings or earnings volatility. These mismatches are reported to management and are subject to internal and regulatory limits.

50. Interest rate risk

Interest rate risk is defined as the current or prospective risk to earnings or capital arising from adverse movements in interest rates. Sensitivity measures like Basis Point Value (BPV) are used to measure and manage risk arising from its fixed income exposures. The BPV measures the effect of a 0.01 percentage point upward parallel shift in the yield curve on the fair value of these exposures.

Interest rate risk in the trading book

The fixed income trading unit invests mainly in government bonds, domestic municipality bonds, and covered bonds issued by other Icelandic banks. In the following tables the total market value (MV) of long and short positions may not be the same as reported in Note 16 since netting between short and long positions is not applied here.

		30.9.2024			31.12.2023

50. Interest rate risk (continued)

Interest rate risk in the banking book

Interest rate risk in the banking book arises from the Group's core banking activities. The main source of this type of interest rate risk is the risk of loss from fluctuations in future cash flows or fair value of financial instruments as interest rates change over time, reflecting the fact that the Group's assets and liabilities are of different maturities and are priced relative to different interest rates.

The following table shows the interest sensitivity of the Group's banking book from a parallel upward 100 basis points change in all yield curves, with all other variables held constant, categorised by the repricing date. The interest rate sensitivity in the banking book is estimated using contractual cash flows except for callable debt issued and applicable non-maturing deposits (NMDs) where behavioural assumptions are applied.

51. Currency risk

Currency risk is the risk that earnings or capital may be negatively affected from the fluctuations of foreign exchange rates, due to transactions in foreign currencies or due to a mismatch in the currency composition of assets or liabilities.

The analysis of the Group's foreign currency exposure presented below is based on the contractual currency of the underlying balance sheet items. Additionally, there are off-balance sheet items that carry currency risk and are included in the total currency imbalance. The off-balance sheet amounts below represent the notional amounts of derivatives and unsettled spot agreements.

In 2024, the Group updated its methodology for managing currency risk related to debt issued measured at fair value. The analysis of the Group's foreign currency exposure at 30 September 2024, reflects this change. Debt issued measured at fair value is presented at fair value instead of the nominal amount plus accrued interest. This better reflects foreign exchange differences recognised in the Group's financial statements. Comparative figures have been changed to reflect the updated methodology.

^{*}In 2024, the Group updated its methodology for managing currency risk related to debt issued measured at fair value. The analysis of the Group's foreign currency exposure at 30 September 2024, reflects this change. Debt issued measured at fair value is presented at fair value instead of the nominal amount plus accrued interest. This better reflects foreign exchange differences recognised in the Group's financial statements. Comparative figures have been changed to reflect the updated methodology.

52. Inflation risk

The Group is exposed to inflation risk since the value of CPI-linked assets exceeds CPI-linked liabilities. The value of these assets and liabilities changes according to changes in the CPI at any given time and all changes in the CPI affect profit and loss. A 1% increase in the index would lead to an ISK 2,150 million increase in profit before tax and a 1% decrease would lead to a corresponding decrease, other risk factors held constant.

	30.9.2024	31.12.2023

Short positions	116	11
Total CPI-linked liabilities	282,283	278,016
CPI imbalance	214,993	129,445

53. Capital management

The following tables show the capital base, the risk exposure amount (REA), the resulting capital ratios, and the leverage ratio for the Group at 30 September 2024 and 31 December 2023.

The Group's regulatory capital requirement is calculated according to EU regulation no. 575/2013 as implemented through the Act on Financial Undertakings no. 161/2002. Capital requirement calculations for credit risk, market risk and operational risk are based on the standardised approach whereas the simplified standardised approach is used for counterparty credit risk.

The Group aims at managing its capital position and the corresponding capital ratios above the overall regulatory capital requirement. According to the latest SREP report from the Financial Supervisory Authority of the Central Bank, the Bank shall as of 30 June 2024 maintain an additional capital requirement of 1.8% of the risk exposure amount. The Group's overall capital requirement, taking into account capital buffers, is 19.7%. The Group's capital target includes a 1-3% management buffer on top of the overall capital requirement.

The minimum leverage ratio for Icelandic financial institutions is 3%.

	30.9.2024	31.12.2023

^{*}The AGM of Íslandsbanki held on 21 March 2024 authorises the Board of Directors to acquire on behalf of the Bank up to 10% of issued share capital of the Bank. The Central Bank has furthermore granted a permission for the Bank to acquire, through buyback, share capital of the Bank equivalent to ISK 10 billion in addition to the previously approved ISK 5 billion, which is within the 10% authorisation from the AGM. At 30 September 2024 ISK 5.9 billion remained of the approved buyback and is therefore deducted from CET1 capital.

Leverage ratio	13.0%	13.4%

54. Minimum requirement for own funds and eligible liabilities (MREL)

The minimum requirement for own funds and eligible liabilities (MREL) for Íslandsbanki is based on the Bank's resolution plan that is approved by the Icelandic Resolution Authority. The requirement can be met with the total capital base in addition to senior non-preferred and senior preferred debt with some conditions, such as having more than one year to maturity. This debt is referred to as eligible liabilities. The subordination requirement provided for in the Bank Recovery and Resolution Directive II (BRRD II) has not been implemented in Iceland. No market confidence charge is applied in Iceland.

The MREL requirement for Íslandsbanki is the sum of the loss absorption amount (LAA) and recapitalisation amount (RCA). At 30 September 2024 the LAA and RCA were both equal to the total SREP capital requirement for 2024 of 9.8%, resulting in an MREL requirement of 19.6% of REA.

	30.9.2	024	31.12.2	2023
