## Goodbye Kansas Studios receives large order for immersive video installation

Goodbye Kansas Studios has received a substantial order from a new commercial customer for the production of content for a large immersive video installation. The total value of the order amounts to approximately SEK 20 million and the project will commence immediately and run until the third quarter of 2025.

"This order comes from a new client in the commercial sector, and it is especially pleasing to see that our successful work for the entertainment industry has also gained attention from other segments. The order adds to recent VFX-orders as well as an order for a game project, with a combined order value of more than SEK 10 million, and means that we continue to strengthen our order book. This further solidifies Goodbye Kansas momentum for 2025, and we maintain our focus on delivering on customer expectations through our outstanding talents and technology," says Stefan Danieli, CEO of Goodbye Kansas Group.
