

## Quickbit adds payment methods for buying cryptocurrency in Quickbit App

Quickbit continues to expand its customer offering by launching cryptocurrency purchases directly from the EUR account in Quickbit App. This means that the user can now choose to either buy cryptocurrency with their card or from their EUR account.

In early November, Quickbit launched the option to open an EUR account in Quickbit App, which allowed the user to exchange from cryptocurrency to EUR. In addition, users can send and receive transactions from accounts at other banks. Previously, the user could buy cryptocurrency by card payment, but now the option to buy directly from the EUR account is also offered. Quickbit continues to strengthen its unique value offering in Sweden and takes another step closer to a market-leading position.

"In line with our mission, to simplify the use of cryptocurrencies in people's everyday lives, we are now making it even easier for our users to move between cryptocurrencies and traditional currencies," says Hammad Abuseifan.
