

Therese Lindgren is appointed as new Head of Product at Quickbit

In November, Therese Lindgren joined Quickbit as responsible for the Quickbit App and its functionality. Quickbit is now appointing Therese as the new Head of Product. Therese has long and broad experience from product development in both fintech and banking, including Resurs Bank, Payair and DNB.

"It feels fantastic to be part of the Quickbit team and I look forward to the journey we have ahead of us. I see it as an exciting challenge to be involved in establishing new, innovative products in a market that is growing and changing so fast. The crypto market is only at the beginning of its development and new opportunities are constantly opening up," says Therese Lindgren.

"We are really happy that we have managed to tie Therese Lindgren to Quickbit. Her substantial and strong fintech experience will be very valuable in our continued investments in market-leading solutions. Therese has contributed to the latest product launches and has shown strong leadership in the product organization. With the appointment of Therese, the last piece in the planned reinforcements in the product and technology area in the management team is in place", says Hammad Abuseifan, CEO Quickbit.

Therese Lindgren will take up her new role on December 19, 2022 and will be part of Quickbit's management team. She succeeds Ejub Bivic, who left Quickbit in October.
