NEW ORDER REGARDING SAAB NLAW

KebNi AB (publ) has received a supplementary order regarding the IMU for Saab's NLAW missile

Stockholm, 17 March 2022 – Today, Kebni announces a supplementary 110 KSEK order from Saab that relates to the ongoing development project. As earlier communicated, Saab has contracted Kebni to develop and provide a tailored IMU (Inertial Sensing Unit) for their product NLAW. The IMU is a key component for the missile's navigation.

The project proceeds well and in accordance with Saab's time plan. Development work is currently ongoing, which is planned to be followed by industrialization and deliveries.

This new order expands the previous scope, by adding supplementary work in support of the project.

"We're proud to support Saab and the game changing defensive NLAW product. Although the value is small, the order sends an important signal that our project is on track and that Saab trusts Kebni as a key supplier." – Erik Winther, Head of Sales

For more information contact, CEO Torbjörn Saxmo on +46 (0) 70-916 14 82.
