NEW AUTONOMOUS VEHICLE CLIENT ORDERS KEBNI SENSATION

KebNi AB (publ.) has received an order for the ISO26262-compliant SensAltion platform from a leader in self-driving solutions

Stockholm, 21 March 2022 Today, Kebni announces an order from a new client after getting shortlisted through in-depth technical qualification. The order value is approx. 50KSEK and regards physical assessment of Kebni SensAltion.

The multinational client is a leader in self-driving solutions for passenger and goods transport.

The order features both IMU (Inertial Sensing Unit) and INS (Inertial Navigation System) functionality. The INS version includes full IMU functionality, dual GNSS/GPS receivers, and advanced sensor fusion algorithms to leverage the combination of sensors in the best way possible.

Kebni SensAltion is one of very few IMU and INS alternatives compliant with ISO26262, the standard for functional safety of road vehicles. High functional safety standards are a strong plus for vehicles operating in controlled environments, and a requirement for any vehicle with autonomous ambitions in traffic.

“Kebni’ s inertial sensing expertise attracts a lot of interest. The SensAltion platform offers great performance and compliance with all relevant standards and requests, as confirmed by this order. We look forward to building a strong partnership with our new client.” – Erik Winther, Head of Sales
