

## Christer Norström appointed acting chairman of Realheart

**Christer Norström, born 1961, is appointed acting chairman of the board of Realheart, of which he has been a member since 2021. He replaces former chairman Göran Hellers who recently passed away, as previously announced.**

Christer Norström has extensive experience from both academia and industry.

He holds a PhD in engineering and is an associate professor in mechatronics and professor in computer engineering.

Christer Norström is currently CEO of ABB Industrial High School and a member of the Royal Swedish Academy of Engineering Sciences, IVA. He also holds board positions in Prindit and Västerås marknad & näringsliv AB.

He has previously been CEO of RISE Research Institutes of Sweden.

*Scandinavian Real Heart AB develops a total artificial heart (TAH) for implantation in patients with life-threatening heart failure. Realheart TAH has a unique, patented design that resembles that of the natural human heart. The artificial heart consists of a four-chamber system (two atriums and two chambers) which provides the opportunity to generate a physiologically adapted blood flow that mimics the body's natural circulation. A unique concept in the medical technology world.*
