

## CLIMEON SELECTED FOR H&M AND WWF CLEANTECH PROGRAMME

Climeon has been selected to participate in the H&M and WWF Cleantech Programme for H&M suppliers. The programme aims at stimulating cleantech investments in the best available technologies to reduce emissions and costs in H&M's supply chain.

In 2019 H&M and WWF initiated a Cleantech Programme for the supply chain in cooperation with GloFin Advisory AB. The aim is to develop a cleantech financing programme with profitable solutions to H&M suppliers for implementation of clean technology. Several cleantech vendors have been evaluated within the framework of the programme before being selected as preferred suppliers.

*- We are thrilled to be presented as one of the preferred cleantech solutions for H&M suppliers, says Thomas Öström, CEO of Climeon.*

*- Climeon's technology for waste heat recovery can increase energy efficiency and reduce CO2 emissions in H&M's value chain, continues Thomas Öström.*

*- We believe that Climeon's high quality products for waste heat recovery will fit well into this Programme and we look forward to them presenting their technology to H&M's suppliers at our Cleantech Expo in March, says Stefan Jonsson from Glofin, responsible for the programme.*

Through the H&M and WWF Cleantech Programme suppliers are provided with an energy audit to identify improvement areas, a selection of preferred cleantech vendors as well as financing solutions in order to speed up the implementation of cleantech with H&M Suppliers.

As a first step, Climeon will participate in the H&M and WWF Cleantech Expo in New Delhi, in March 2020 and present the company's solution for waste heat recovery for H&M suppliers as well as visit relevant manufacturing sites.
