

Press release 2008-09-12

New Sentinel systems ready for delivery

C-RAD AB with its three fully owned subsidiaries develops new and innovative solutions for the use in advanced radiation therapy. The company has released a new hardware update and transferred the manufacturing of the Sentinel system to a subcontractor.

The Sentinel hardware has been further developed in order to increase the quality, improve the service friendliness and lower the manufacturing costs. The manufacturing process has been streamlined and transferred to a subcontractor, a company with long experience of medical devices manufacturing. After a six months long production break we are now able to manufacture and deliver Sentinel systems to our customers. The subcontractor is currently manufacturing ten Sentinel systems that will be ready for delivery at the end of September.

Cristina Svensson, CEO, C-RAD Positioning AB:

“The intensive work during 2008 to improve the quality and lower the manufacturing costs for the Sentinel system has now been successfully completed.

By transferring the manufacturing process to a subcontractor we will also be able to manufacture the Sentinel systems with high quality and reduce delivery time. We are very pleased to start deliveries of ordered systems to our customers.”
