CEO's commentary

Careium delivers a solid start to 2024 with growth, strong profitability, and positive cash flow. The headwinds faced in the UK following the government's changes to the analogue-to-digital transition persisted throughout January, yet with a governmental update on the timeline and a firm 2025 date in place, sales normalized for both February and March.

Careium delivered net sales of SEK 210.7 million (194.0), an increase of 8.6 percent. Gross margin increased to 42.9 percent (38.9) reflective of our work to continuously effectives our business and active steering of the product mix. We delivered a markedly increased EBIT of SEK 19.1 million (7.3), corresponding to an operating margin of 9.1 percent (3.8), an increase of 160.8 percent. Organic growth continued with an increase of 8.8 percent in services year-on-year and corresponding 8.1 percent increase in product sales reflecting the demand for our innovative hardware. Free cash flow generated was SEK 16.6 million (28.2). While the quarter's free cash flow was lower than previous year, the latest six-month free cash flow including Q4 2023 reached SEK 52.4 million, a significant increase from SEK -25.2 million the year before.

Across the quarter, the Nordic sales were SEK 97.6 million (89.6), growing by 8.9 percent and reaching a gross margin of 39.2 percent (38.1) indicating improved performance. The UK and Ireland sales kept stable at SEK 78.0 million (78.1), with a significantly improved gross margin of 39.6 percent (34.0). The Netherlands delivered sales of SEK 19.0 million (17.4), growing by 9.2 percent with an improved gross margin of 61.5 percent (58.6). Sales in region Other markets (Germany and France) grew by 80.1 percent to SEK 16.1 million (9.0) with a strong gross margin of 58.6 percent (52.7).

A stand-out highlight in the quarter was that our new mobile social alarm "Abby" – Aimed for seniors who are out and about and the younger senior – has surpassed any past Careium product in sales/orders for its first quarter on the market. This is a strong indication of the markets' receptiveness to innovative devices and peripheral launches and highly relevant for retail and direct-to-consumer channels.

Another important achievement was surpassing 100,000 installed units of the Eliza family – Our premiere 4G hub unit serving as the center for data, connectivity and the very heart of the ecosystem around our seniors, connecting all sensors, data flows and alarms. This installed base will be a

"The year starts with growth combined with, strong profitability and positive cash flow"

foundational asset for add-on services and innovation for many years to come.

During the quarter our UK business has taken its next steps toward greater efficiencies building on the changes made during winter – 65% increase in local EBITDA vs first quarter 2023 and multiple contract wins in the SEK 1-3 million per annum range. I'm also proud, as both CEO and interim UK director, to hand over the UK reins to industry veteran Joe McLoughlin, joining as permanent director for UK starting 3 June 2024. Joe's strong multi-year sector experience, leadership, and unique combination of a commercial and technical background with strong industry networks is the perfect combination to lead Careium UK and its talented teams.

The first quarter of 2024 did not fully meet our guidance in relation to the growth outlook. However, we are proud of how our team has delivered strong profitability in the quarter. We retain our guidance for growth and profitability for the full year.

Christian Walén, President and CEO

Net sales

Highlights during the first quarter

Careium's net sales for the first quarter amounted to SEK 210.7 million (194.0), an increase of 8.6 percent compared to the first quarter of 2023. Adjusted for currency effects, growth amounted to 7.7 percent.

The number of connections at the end of the period was 370.800 (378,100). The loss of a few large customer contracts in the UK explains the decrease in connections.

Profitability

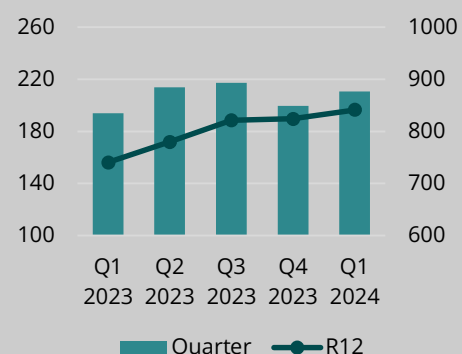

Highlights during the first quarter

Gross margin amounted to 42.9 percent (38.9) during the first quarter of 2024. Gross margin was positively affected by decreased cost of service delivery in the alarm receiving centres, as a result of efficiency improvements, as well a steering of the product mix.

EBITDA increased to SEK 34.9 million (25.4) which corresponds to an EBITDA-margin of 16.6 percent (13.1). EBITA amounted to SEK 21.8 million (12.0). EBIT increased to SEK 19.1 million (7.3), resulting in an EBIT margin of 9.1 percent (3.8). The improved EBIT margin is explained by the growth in sales and continuous work on efficiency, systems and processes.

Net financial items for the first quarter totaled SEK -0.5 million (0.7). Net interest amounted to SEK -3.4 million (-3.6) and exchange rate gains to SEK 2.9 million (4.3). Group tax for the quarter was SEK -4.3 million (-1.8). Profit after tax for the period amounted to SEK 14.3 million (6.3).

Financial development

Cash flow, investments and financial position

Cash flow from current activities during the first quarter amounted to SEK 28.9 million (37.9). The lower cash flow compared to the first quarter last year despite improved profitability is explained by high delivery of devices on rental contract increasing the financial lease receivables.

Free cash flow amounted to SEK 16.6 million (28.2). Investments during the period increased to SEK 12.3 million (9.7).

Cash and cash equivalents totaled SEK 46.4 million (53.4) at the end of the first quarter. The bank overdraft facility showed available cash of SEK 50.0 million (28.3). The equity ratio was 60.5 percent (57.6). Net debt amounted to SEK 182.5 million (223.7) at the end of the first quarter.

Outlook for 2024

For the full year 2024, Careium expects an organic sales growth of 12 to 15 percent. Alongside the robust growth in sales, we expect EBIT to increase in 2024.

Free cash flow, SEKm

Highlights by region

Net sales for Careium in the first quarter amounted to SEK 210.7 million (194.0), an increase of 8.6 percent compared to the first quarter of 2023. Sales in the Nordics amounted to 46 percent (46) of total revenues and sales in the UK amounted to 37 percent (40). Of the remaining sales, Netherlands counted for 9 percent (9) and Other markets (mainly Germany and France) 8 percent (5).

Net sales in the Nordics increased 8.9 percent to SEK 97.6 million (89.6) compared to the first quarter of 2023. The increase in sales is related to increased service sales of SEK 89.7 million (80.5) corresponding to 11.4 percent. This growth is mainly related to the net win of service contracts in Sweden the last year. Product sales amounted to SEK 7.8 million (9.0), a decrease of 13.4 percent.

Gross margin was 39.2 percent (38.1). The improvement compared last year was mainly due to the lower cost of service delivery due to improved efficiency in our alarm receiving centres.

Net sales in the United Kingdom and Ireland decreased 0.1 percent to SEK 78.0 million (78.1) compared to the first quarter of 2023. The increase of service sales to SEK 43.4 million (42.2) corresponding to 2.9 percent compensated for the decrease of product sales. With clarity on the analogue to digital transition in the UK, sales of products normalized for February and March following a weak January.

Gross margin in the quarter improved significantly to 39.6 percent (34.0). The implementation of changes to improve the service efficiency explain the improvement compared to the first quarter 2023.

Use of non-IFRS results measurement

Guidelines regarding alternative key figures for companies with securities listed on a regulated market within the EU have been issued by the ESMA (European Securities and Markets Authority). These guidelines shall be applied to alternative key figures that are used with effect from 3 July 2016. The interim report has references to a number of non-IFRS result measurements that are used to help both investors and management in analysing the company's activities. Below we describe the non IFRS result measurements that are used as a supplement to the financial information that is reported according to IFRS.

Description of financial result measurements that are not found in the IFRS rules

Non-IFRS result measurement	Description	Reason for use of measurement
Restructuring costs	Costs of impairment and personnel costs in connection with restructuring.	This measurement shows the specific costs that arise in connection with restructuring of a specific activity, which contributes to better understanding of the underlying cost level in the ongoing operational activities.
Gross margin %	Net sales minus cost of goods and services sold as a percentage of net sales.	The gross margin is an important measurement for showing the margin before other costs.
Currency adjusted sales growth %	Net sales for the period recalculated with exchange rates for the corresponding period the previous year minus net sales for the corresponding period the previous year as a percentage of net sales for the corresponding period the previous year.	This measurement shows sales growth with currency effects cancelled out.
Equity ratio	Equity expressed as a percentage of total assets.	A traditional measurement for showing financial risk, expressed as the percentage of the total capital that is financed by the owners.
Return on average equity	Rolling 12-month profit after financial items and tax divided by average equity.	Shows from a shareholder perspective what the return is on the owners' invested capital.
Capital employed	Total assets less non-interest-bearing liabilities and cash and bank deposits.	The measurement shows how much total capital is used in the operation and is thus the only component in measuring return from the activities.
Return on average capital employed	Rolling 12-month operating profit divided by the average quarterly capital employed.	The key measurement for measuring the return on all the capital in the company.
Number of connections	Number of subscription customers connected to alarm reception.	This measurement shows the volume of customers in the services activities.

About Careium

Careium is a leading player in technology enabled care in Europe. Careium's innovative solutions improve the safety, quality of life and independence of seniors both inside and outside the home. Careium provides its products and services to ~400,000 seniors in Sweden, Norway, the UK, Netherlands, Germany and France. Most of the seniors are connected to one of Careium's alarm receiving centers in Sweden, Norway and the United Kingdom where approximately 25,000 alarms are handled every day by one of our 600 employees in the alarm receiving center.
