Kebni receives 58 MSEK order from Saab

Kebni receives additional order regarding tailored sensor units for Saab's NLAW. The order value is 57,9 MSEK with deliveries planned for 2025.

Kebni AB (publ) has received its third volume order regarding continued production and deliveries of the tailor-made IMU (Inertial Measurement Unit) for Saab's NLAW antitank system. The order value is 57,9 MSEK and deliveries are planned for 2025.

With this order, Kebni has received IMU orders from Saab valued at a total of 214 MSEK over the past 14 months. Production and deliveries of the first order is currently ongoing.

"This third order confirms Kebni's ability and trustworthiness in quickly transforming critical application's demanding requirements into series delivered products. As the IMU deliveries for NLAW proceeds, we're excited to concurrently focus on additional client projects." says Erik Winther, Head of Sales at Kebni.

In June 2020, Saab awarded Kebni a framework agreement to develop and deliver a tailored sensor unit, designed to enable precise stabilization and positioning for the NLAW antitank missile.
