

NEP The Netherlands streamlines Master Control Room operations with Net Insight

Will leverage resource management solutions to eradicate manual bottlenecks and facilitate business expansion

Stockholm, Sweden – Net Insight, the leading provider of live streaming, media transport and resource scheduling, today announced that NEP The Netherlands, a leading outsourcing partner in television and internet capturing for public and commercial broadcasters, is to integrate Net Insight ScheduALL® solutions to radically streamline end-to-end service ordering and fulfilment.

The company will implement Net Insight's ScheduLINK® solution into its Livecenter, the Master Control Room, and their bookings desk to streamline booking, planning and real-time management of all contribution feeds. The ScheduALL software provides NEP The Netherlands with comprehensive cost center allocations, automated pricing, cancellation rate cards and invoicing capabilities. ScheduALL Portal™ is also part of the solution to be deployed, thus allowing customers to self-serve, requesting NEP services over an intuitive web application. The end-goal is to largely automate the booking process for NEP's major customers. Eliminating error-prone emails, manual processes, duplicated efforts and conflicts. Implementation will take place during the fourth quarter of 2017.

"We needed a solution to replace our current time-consuming manual processes with a system that will streamline complex technical operations," says Casper Choffat, R&D Manager at NEP The Netherlands. "Net Insight's solutions are the perfect fit for our business. Going forward, it will be an integral part of our ability to cater for high-volumes as well as giving us valuable real-time insight into resource availability and management for all our end-to-end contribution services."

"We are excited to welcome NEP The Netherlands as users of our ScheduALL solution portfolio, which offers simplified management of complex environments resulting in immediate and tangible operational benefits," says Fredrik Tumegård, CEO of Net Insight. "Moving forward NEP The Netherlands can become part of Net Insight's Connector Marketplace, our one-stop-shop for booking media services with full budgeting, billing and financial visibility."

About Net Insight

Net Insight's vision is to enable a live and interactive media experience for anyone on earth. Our aim is to lead progress and enable a global media marketplace where live content can be exchanged and interaction among TV audiences can take place in real-time. We want to create the media experience of the future, centered on content.

Net Insight delivers products, software and services for effective, high-quality media transport, coupled with the effective management of resources, all, which creates an enhanced TV experience. Net Insight's offerings span across the entire media spectrum, starting from TV cameras and TV studios, right through to the TV consumers. Our solutions benefit network operators, and TV and production companies, by lowering total cost of ownership, improving their workflow efficiencies and providing them with the ability to capture new business opportunities.

More than 500 world-class customers run mission critical media services using Net Insight's solutions, covering more than 60 countries worldwide. Net Insight is listed on Nasdaq Stockholm.
