## Precise BioMatch Mobile integrated in a tablet from a leading Chinese vendor

Precise Biometrics' algorithm solution for fingerprint recognition in mobile devices, Precise BioMatch™ Mobile, has through cooperation with Synaptics Incorporated (NASDAQ: SYNA) been integrated in an updated version of a previously launched tablet from a leading Chinese vendor.

The integration will generate royalty revenue starting from the second quarter 2016. Royalty revenues are based on the number of sensors Synaptics delivers to the device manufacturer and cannot be forecasted at this point.

*"We are very pleased to be integrated in our first mobile device as the result of the collaboration with Synaptics. Precise Biometrics fingerprint software is integrated in products from over 30 smartphone vendors and has become the preferred choice to ensure a superior user experience and secure identity verification on mobile devices", says Håkan Persson, CEO of Precise Biometrics.*

Precise BioMatch Mobile is the industry leading algorithm solution for convenient and secure fingerprint recognition on smartphones and tablets. The unique and patented hybrid algorithm solution is optimized for small fingerprint sensors and platforms with limited processing power and memory space. Precise BioMatch Mobile offers fast, accurate, and secure verification of user's identity, creating a convenient user experience when unlocking mobile devices or authenticating to services.
