

PRECISE BIOMETRICS RECEIVES TACTIVO™ ORDERS FROM TWO LEADING MOBILE SOFTWARE PROVIDERS

Thursby Software Systems and an additional recognized partner have together placed orders exceeding one thousand Tactivo™ units for delivery in Q4, 2012. Tactivo enhances the software applications provided by these partners, enabling increased mobile security by adding authentication using smart cards, fingerprint biometrics, or both, for the iPhone® and iPad®.

These initial orders underscore the market potential for the Tactivo product line. Precise Biometrics is also offering a new bundle solution with Thursby's PKard® Reader app. The Tactivo/PKard Reader bundle offering will create significant value to US federal agencies seeking to provide their employees with convenient and secure Web browsing on mobile devices.

This bundle is the first integrated solution available to any US federal government agency that provides a secured Web browsing in a mobile environment by conveniently leveraging smart card credentials already used for identification and access across federal agencies.

"We are thrilled to see leading solution providers partnering with us and starting to place orders in anticipation of meeting their customers' needs for Tactivo," said Thomas Marschall, President and CEO of Precise Biometrics. "It has been exciting to join forces with Thursby Software and to create a new bundled solution".

"The market for smart card readers linked to mobile devices is at its infancy stage and customers are looking for multiple options in terms of pricing and form factors," said William Thursby, President of Thursby Software Systems, Inc. "Precise Biometrics has created an outstanding option for iOS mobile devices and we are delighted to partner with them in that segment of the market. By working together in putting together the bundle solution, we have created a breakthrough solution that has no equivalent in the market place. As part of our joint marketing efforts, we are looking forward to play our part in accelerating the market adoption for the Tactivo/PKard bundle across our established customer base. "

About Precise Biometrics

Founded in 1997, Precise Biometrics is an innovative company providing secure, flexible, and cost-effective products to address the unique security requirements of the government and enterprise markets worldwide. Precise Biometrics' technology has been deployed for national ID card programs by several governments including Thailand, Portugal, and Nigeria. In 2002, the U.S Department of Defense and the Department of State began using Precise Biometrics' technology, and today continues to save millions of dollars every year on password administration.
