

## **Tactivo™ for iPad 4th Generation obtains MFi approval by Apple**

**Tactivo is the first mobile smart card and fingerprint reader based on the new Lightning connector, which has been approved by Apple. This new version also supports payment chip cards.**

Thomas Marschall, President and CEO of Precise Biometrics, says:

“We are pleased to announce that Tactivo for iPad 4<sup>th</sup> Generation has been MFi approved by Apple and thereby is ready for global launch. We already have pending orders from both old and new Tactivo customers.”

Tactivo for iPad 4<sup>th</sup> Generation is the first mobile smart card and fingerprint reader, based on the new Lightning connector, available in the market. It proves, once again, the market leading position Precise Biometrics has within this segment.

Together with apps and solutions from Precise Biometrics' partners, Tactivo enables government agencies and companies to maintain a high level of authentication and security when employees use mobile devices to access sensitive information. Tactivo supports both traditional smart cards, such as the US Government PIV and CAC cards, as well as payment chip cards.
