Precise BioMatch Mobile integrated in new smartphone

Precise Biometrics' product for fingerprint recognition in mobile devices, Precise BioMatch™ Mobile, has through cooperation with Fingerprint Cards (FPC) been integrated in a new Chinese smartphone.

The integration will generate license revenue starting from the third quarter 2015. The value of license revenue is based on the number of sensors FPC delivers to the mobile phone manufacturer and cannot be forecasted at this point.

"We are pleased that the vendor has chosen to integrate Precise BioMatch Mobile in an additional smartphone model. High performance fingerprint software is crucial to ensure a good user experience and secure identity verification", says Håkan Persson, CEO of Precise Biometrics.

[Precise BioMatch Mobile](#) provides easy integration of fingerprint matching functionality for smartphones and tablets, and is optimized for small touch sensors in mobile environments through a unique patented hybrid algorithm. The software offers fast, accurate, and secure verification of the user's identity, creating a convenient user experience for consumers when unlocking their mobile device or authenticating to services, while delivering enhanced security.

Precise Biometrics also offers fingerprint technology to stationary and embedded solutions. [Precise BioMatch™ Embedded](#) provides easy integration of fingerprint matching functionality for numerous environments and applications.

This press release contains information that Precise Biometrics is required to disclose pursuant to the Swedish Financial Instruments Trading Act (1991:980). The information was submitted for publication at 15.15 pm CEST on September 28, 2015.
