Tactivo follow-on order from US Department of Defense

Precise Biometrics has won an order of Tactivo from the Defense Logistics Agency (DLA) within the US Department of Defense. The value of the order is 975 000 SEK and will impact first quarter revenues 2016 with the full amount.

DLA continues to invest in their mobility solution that provides secure e-mail and browsing capabilities on iOS devices. The solution is based on the existing Common Access Card (CAC) infrastructure and adds to the overall usability of the long standing smart card system. The order included Tactivo for iPhone 6 and has been placed through Precise Biometrics' partner Carahsoft.

"The interest in Tactivo within the US Department of Defense continues to grow and we are pleased that DLA expands the number of Tactivo users. The solution increases employee flexibility and efficiency, while ensuring a high level of security by utilizing two-factor authentication", says Håkan Persson, CEO of Precise Biometrics.

Tactivo is a product portfolio of smart card readers for smartphones and tablets. Tactivo enables convenient and secure mobility for organizations using smart cards to log on to IT systems, thereby contributing to a more efficient and better work environment, increased information security and reduced costs in the business. Tactivo supports multiple card standards such as CAC and PIV. For more information about Tactivo, please visit; <http://www.precisebiometrics.com/mobile-smart-card-readers>
