

Press Release, 2022-01-25

Volotea selects ClearPath flight optimization service from AVTECH for improved flight efficiency and reduced emissions

AVTECH Sweden AB (publ) and Volotea Airlines have today entered into a 3-year agreement for AVTECH's ClearPath service, with a start date of January 1st, 2022 and an expected total value in the range of 2.2 to 3.2 MSEK dependent on fleet size and EUR exchange rate.

The ClearPath flight optimization service, based on state-of-the-art high-resolution aviation weather forecasting from the Met Office, provides precise and tailored tactical decision support for Volotea's pilots to improve the efficiency of each individual flight. By providing its flight crews with up-to-date guidance on the most efficient flight altitudes, Volotea is able to significantly reduce their total CO² emissions.

“We are extremely glad to welcome Volotea as our first Airbus operator implementing ClearPath in their daily operations. We are now looking forward to expanding the service to the entire fleet and to support and be part of their journey towards sustainable aviation”, says Niklaes Persson, Sales and Marketing Director at AVTECH.

About ClearPath

ClearPath is the latest addition to AVTECH's service offering. The service delivers an optimum flight path for each individual flight in real-time. The calculation of the optimum flight path is fully automatic and based on a combination of actual aircraft performance data and tailored high-resolution weather from Met Office UK. This gives the pilots tactical decision support to operate each flight more efficiently resulting in up to 3% average reduction in fuel consumption and CO² emissions. ClearPath is delivered as a service that requires no aircraft hardware investments which allows airlines to test it in their operations for free.

About AVTECH Sweden AB (publ)

AVTECH develops products and services for digital air traffic control systems. Customers are the aviation industry's various players such as airlines, airports, aviation, technology companies and aircraft manufacturers. With the help of the company's products and services, each individual flight or the entire flight operation can be optimized in terms of economy, noise and emissions, efficiency, punctuality and safety. The head office is in Stockholm / Kista. AVTECH Sweden AB (publ) is listed on NASDAQ First North Growth Market and has appointed Redeye AB to certified adviser. Email address: certifiedadviser@redeye.se and telephone number +46 (0)8 121 576 90.

About Volotea

Volotea was founded in 2011 by Carlos Munoz and Lázaro Ros, previously founders of Vueling, and is one of the fastest-growing independent airlines in Europe, increasing year-on-year its fleet, routes served, and seats offered. Since its start, Volotea has carried almost 40 million passengers across Europe.

Volotea is currently based in 18 European small and mid-sized capitals and serves more than 100 cities across 15 countries. The airline employs more than 1,350 people across Europe and, compared to its competitors, was the busiest airline in 2021 in terms of recovery of load factor, operations and customer satisfaction.
