

Obducat receives order for an EITRE[®] 3 NIL-system from KAUST in Saudi Arabia

OBDUCAT AB (publ) subsidiary Obducat Technologies AB, a leading supplier of lithography solutions based on nanoimprint lithography (NIL), has received an order from KAUST, King Abdullah University of Science and Technology, in Saudi Arabia for the supply of a EITRE 3 NIL-system. The order value amounts to approx. 1.3 million SEK.

The EITRE 3 system will be installed at KAUST Nanofabrication Core Lab which supports research in the fields of microelectronics, electronic materials, nanotechnology, MEMS, biomedical and optical devices requiring a low-density particle environment. The Nanofabrication Core Lab is equipped with a 2,000-square-meter cleanroom consisting of both class 100 and class 1000 areas. It is fully equipped with a wide range of tools at the forefront of nanotechnology, providing a high level of versatility and support for nanofabrication. The Nanofabrication Core Lab also includes a thin film lab, which provides tools to support and enhance the thin film deposition process.

The EITRE 3 system is planned to be delivered in the third quarter this year.

About KAUST

King Abdullah University of Science and Technology (KAUST) advances science and technology through distinctive and collaborative research integrated with graduate education. Located on the Red Sea coast in Saudi Arabia, KAUST conducts curiosity-driven and goal-oriented research to address global challenges related to food, water, energy, and the environment. Established in 2009, KAUST is a catalyst for innovation, economic development and social prosperity in Saudi Arabia and the world. The University currently educates and trains master's and doctoral students, supported by an academic community of faculty members, postdoctoral fellows and research scientists. With over 100 nationalities working and living at KAUST, the University brings together people and ideas from all over the world. Read more at www.kaust.edu.sa.

About Obducat AB (publ)

Obducat AB (publ) is an innovative developer and supplier of technologies, products and processes used for the production and replication of advanced micro and nano structures. Obducat's products and services serve the demands of companies within the LED, OLED, semiconductor, displays, biomedical and MEMS industries. Obducat's technologies include nano imprint technology, coating technology and wet processing technology. Obducat has offices in Sweden, Germany and China and the headquarter is located in Lund, Sweden. Obducat is a public company. Obducat's shares are traded on the Swedish NGM Main Regulated Equity exchange. Read more at www.obducat.com.
