

Obducat receives pilot order valued at 2.6 MSEK

OBDUCAT AB (publ) subsidiary Obducat Technologies AB, a leading supplier of lithography solutions based on nanoimprint lithography (NIL), has received a pilot order related to the evaluation project that was communicated in January 2020. The customer is a European company active within photosensor technologies. The pilot order concerns the production of a larger test batch of optical components. The order value amounts to approx. 2.6 MSEK.

The order concerns a larger pilot production run of optical components produced by using Obducat proprietary NIL technology. Delivery is scheduled to take place during fourth quarter of this year.

Upon a successful completion it is the customer's intention to enter into a long-term agreement with Obducat concerning continuous production of optical components. Due to confidentiality requirements further information cannot be disclosed at this point.

" After significant delay due to the Corona pandemic, Obducat has successfully completed several iterations of test runs during the last two years. This is yet another important milestone in our strategic work aimed at expanding our Foundry Service activities. We are very pleased that we can conclude this milestone by securing another larger order from this company which is a world leader in their field", says Patrik Lundström, CEO of Obducat.

About Obducat AB (publ)

Obducat AB (publ) is an innovative developer and supplier of technologies, products and processes used for the production and replication of advanced micro and nano structures. Obducat's products and services serve the demands of companies within the LED, OLED, semiconductor, displays, biomedical and MEMS industries. Obducat's technologies include nano imprint technology, coating technology and wet processing technology. Obducat has offices in Sweden, Germany and China and the headquarter is located in Lund, Sweden. Obducat is a public company. Obducat's shares are traded on the Swedish NGM Main Regulated Equity exchange. Read more at www.obducat.com.
