

North American AgTech Customer Selects Heliospectra's Smart Lighting Solutions

(Gothenburg, Sweden, March 22, 2022, at 11:20 CET)– Heliospectra AB (publ) (Nasdaq First North Growth Market: HELIO), a leader in smart lighting technology for greenhouse and controlled plant growth environments, announces a new order for a Canadian controlled environment specialist conducting an installation for a global seed producer. The order is for Heliospectra's controllable ELIXIA LED lighting solution, and the order value is \$243,000 USD.

[ELIXIA](#) is designed and built on over a decade of research and experience. Featuring up to four tunable wavelengths, ELIXIA is compatible with the helioCORE™ light control software, allowing growers to set growth zones and schedule light strategies and trials. It is an essential tool for any research project, greenhouse or indoor growth operation seeking full control of light quality and output while delivering superior crop quality.

"As AgTech companies worldwide make large investments in lighting solutions and other resources, consistent performance is of the utmost importance when conducting different crop trials and research applications. ELIXIA and our helioCORE™ solutions provide market-leading control and automation while delivering a high level of reliability to our AgTech customers", said Bonny Heeren, CEO, Heliospectra.

The order will be delivered in Q2 2022.

Heliospectra AB (publ) (Nasdaq First North Growth Market: HELIO) was founded in 2006 in Sweden by plant scientists and biologists with one vision – to make crop production more intelligent and resource-efficient. Today, with customers across six continents, Heliospectra is the global leader in innovative horticulture lighting technology, custom light control systems and specialized services for greenhouse and controlled plant growth environments. Designed by growers for growers, Heliospectra builds customized LED lighting strategies and controls to automate production schedules, forecast yields and monitor crop health and performance with real-time data and response, to deliver the light plants love and the consistent results growers need.
