

# Control Balance Sheet Shows that Heliospectra AB's Share Capital is Intact

**FRI, MAY 24, 2024 17:40 CEST - As previously announced, the board of Heliospectra AB (publ) ("Heliospectra" or the "Company") has decided, for precautionary reasons, to prepare and have the auditor review the Company's control balance sheet as of March 31, 2024. The control balance sheet has now been prepared and reviewed by the auditor, and it shows that the Company's share capital is completely intact.**

The control balance sheet has now been drawn up and reviewed by the auditor, and it shows that the Company's share capital is completely intact. As of March 31, 2024, the equity in the company amounts to SEK 16,734 thousand, of which the share capital amounts to SEK 12,203 thousand.

'The decision to conduct a control balance sheet was a precautionary measure, in line with good practice of communication guidelines, and as anticipated, it has confirmed the full integrity of our share capital. I want to underscore the unwavering unity and support of our main owners, who are fully committed to Heliospectra and its vision. Over the past two years, the Company has implemented significant operational and strategic changes under the leadership of the new management team, and we are eagerly anticipating the opportunities that lie ahead,' says Andreas Gunnarsson, Chairman of the Board at Heliospectra.

**Heliospectra AB (publ)** (Nasdaq First North Growth Market: HELIO) was founded in 2006 in Sweden by plant scientists and biologists with one vision – to make crop production more intelligent and resource-efficient. Today, with customers across seven continents, Heliospectra is the global leader in innovative horticulture lighting technology, custom light control systems and specialized services for greenhouse and controlled plant growth environments. Designed by growers for growers, Heliospectra builds customized LED lighting strategies and controls to automate production schedules, forecast yields and monitor crop health and performance with real-time data and response, to deliver the light plants love and the consistent results growers need.
