

Kebni and Solideq Group teams up to bring high-tech safety solution to the global scaffolding market

KebNi AB (publ) and Solideq Group AB today announces their Letter of Intent to productify, industrialize, produce and offer high-tech personal safety solutions for the global scaffolding market. The resulting personal safety solution is intended to increase personal safety by lowering the risk for scaffolding related injuries and fatalities.

Karlskoga, 23 August 2022 – KebNi AB (publ) and Solideq Group AB today announces their Letter of Intent to productify, industrialize, produce and offer high-tech personal safety solutions for the global scaffolding market.

Kebni has previously publicized the development of a technical core for this need, based on Kebni's inertial sensing expertise. The safety solution senses and analyses barely noticeable vibrations and movements on the scaffolding. Its sensor fusion technology processes the sensor data with artificial intelligence, providing accurate monitoring and alerts in real time. Monitoring proceeds until the scaffolding is dismantled.

Solideq is an international actor in the scaffolding industry. They bring knowledge and market expertise to boost both reach and impact among potential clients.

“This partnership makes perfect sense as both companies are innovative and fast growing, and both companies put personal safety first in our respective industries. We’re now ready to come out as a team and express our objective to jointly address a global issue that hasn’t been solved yet.” – Torbjörn Saxmo, CEO Kebni

The resulting personal safety solution is intended to increase personal safety by lowering the risk for scaffolding related injuries and fatalities. Launch of solutions for both large and small construction sites are scheduled for 2023.

“Solideq’s everyday mission is to provide safe access at height, and I am therefore very excited to announce this new partnership with Kebni. Working together with Kebni using high-level and trusted technology and applying this on a global problem such as scaffolding accidents and safety in general is nothing else than very exciting.” – Tobias Wreje-Larsson, CEO Solideq Group

For more information contact, Kebni CEO Torbjörn Saxmo on +46 (0) 70-916 14 82 or Solideq Group CEO Tobias Wreje-Larsson on +46 (0) 73 961 96 99.

About Solideq Group AB

Solideq – Safe Access – operates in the scaffolding industry primarily in the Nordic countries but supplies all over the world. Solideq develops, produces, and sells scaffolding and weather protection equipment as well as other related products. We have customers within the fields of oil and gas, construction and shipping, but also sell directly to carpenters and consumers. The Group also conducts e-commerce, through the websites stallning.se, solideq.no, solideq.fi, stegproffsen.se and snickarklader.se. For more information, visit www.solideq.com.

About KebNi AB (publ)

Kebni – Bringing Stability to a World in Motion – has a long history and extensive experience in maritime and land-based satellite antenna solutions as well as advanced inertial sensing solutions. The company, headquartered in Stockholm, is a leading supplier of reliable technology, products and solutions for satellite communications, security, positioning, and stabilization. Kebni serves products and solutions to government, military, and commercial customers globally. For more information, visit www.kebni.com.
