

**PRESS RELEASE**

Malmö, Sweden, June 8, 2022

## **Polygiene goes live again at OutDoor by Ispo in Munich**

Visit our booth in person and learn more about complete gear protection and freshness from Polygiene, the environmental impact of products and how we can make them last longer. And, put the [Polygiene technologies](#) through its paces and become one of our testers. Meet you in Munich June 12-14, 2022 at our booth in Hall 2 - no 102, to learn more about durable products and textiles that you can wear more and wash less.

It's our mission to change the way we view products, from fast consumables to durables. The Swedish ingredient brand Polygiene® – leader in Freshness technologies ensures that textiles and products stay fresh and last longer as textiles need to be washed less often. As an added benefit, products can be used for much longer, setting it apart from fast fashion products. Since 2021 we offer full coverage freshness and product protection for all products from the softest textile to plastic surfaces, leather and even metal.

And if you like – try out our technologies right away and become one of our testers. How long can you wear our Polygiene test T-shirt without having to wash it? We are looking forward to your feedback. But be careful: you might never want to take the T-shirt off again.
