## Kebni receives its second volume order from Saab valued 79,8 MSEK

Kebni has received its second order to deliver tailored sensor units to Saab's NLAW. The order value is 79,8 MSEK and deliveries are planned for 2024.

**Karlskoga 1 June 2023** – Kebni AB (publ) has received its second volume order under a framework agreement with Saab. The order entails the production and delivery of tailor-made IMUs (Inertial Measurement Units) for Saab's NLAW antitank system. The order value is 79,8 MSEK and deliveries are planned for 2024.

“We take great pride in our collaboration with Saab, consistently meeting the project's stringent quality requirements and timeline. To us, this second volume order serves as a testament to a successful partnership. As production for the initial volume order from Saab is set to commence in a matter of days, we are delighted to secure this first follow-up order, which will ensure continuous production and gradually increased delivery rates throughout 2024.” says Torbjörn Saxmo, CEO at Kebni.

In June 2020, Saab awarded Kebni a framework agreement to develop and deliver a tailored IMU, an advanced sensor unit enabling precise stabilization and navigation, for the anti-tank system NLAW. The timeline of the development project was intensely accelerated in April of 2022, and the initial volume order valued 76 MSEK was announced in October 2022.
