About Oncopeptides

Oncopeptides is a research and development stage pharmaceutical company developing drugs for treatment of cancer. Since the founding of the Company in 2000, the Company has focused primarily on the development of the product candidate Ygalo, an innovative peptidase-potentiated alkylator intended for effective and focused treatment of blood-based cancer diseases, and in particular multiple myeloma. Ygalo is intended to demonstrate better results from treatment compared to established alternative drugs in the treatment of patients with multiple myeloma. Ygalo could potentially provide treating physicians with a new treatment option for patients suffering from this severe cancer disease. Visit www.oncopeptides.se for more information.
