## About Oncopeptides

Oncopeptides is a research and development stage pharmaceutical company developing drugs for the treatment of cancer. The company focus on the development of the lead product candidate Ygalo®, an innovative, Peptidase Enhanced Cytotoxic (PEncs). Ygalo® is intended as an effective treatment of hematological cancers, and in particular multiple myeloma. The current clinical study program is intended to demonstrate better results from -treatment with Ygalo® compared with established alternative drugs for patients with late-stage multiple myeloma. Ygalo® will potentially provide physicians with a new treatment option for patients suffering from this serious disease.
