## **AVTECH Enters into an Agreement with Icelandair to provide Advanced Data to Cockpit**

AVTECH Sweden AB, with processing and sending advanced information in real-time to the cockpit and aircraft systems as one of its core businesses, today announces that it has entered an agreement with Icelandair ehf, to setup and support their advanced ACARS data transmissions during a limited 3-month time period.

Icelandair, Iceland's leading airline, is in a project to increase flight efficiency and reduce flight crew workload trialing a real-time upload of information to its aircraft via data link. AVTECH will support the final live testing stage of this project.

"It is a pleasure to support one of Europe's most well-known airlines in this important task, says Sören Skog Key account manager. ACARS communication, a ground based communication network used by airlines all over the world, plays an increasing role in air-to ground communication to modern aircraft. ", says Sören Skog, Key Account Manager.

"AVTECH's long experience with advanced ACARS data integration made it possible to support Icelandair in this project. We look forward to further applying our technologies in this field to client applications in the future", says David Rytter, CTO.

This time limited project is of minor financial importance but an important showcase of AVTECH's capabilities in this area.
