

Correction of press release: Dr Ina Laura Perkins new CEO of Realheart

Scandinavian Real heart has sent a translation of a press release with MAR-legend sent this morning. Later in the afternoon, a translation of the same press release was sent in English. The translated press release was sent by mistake with a MAR-legend. This means that the press release with the heading "**Dr Ina Laura Perkins new CEO of Realheart**" sent at 15:09 should not be sent with the MAR-legend.

Scandinavian Real Heart AB develops a total artificial heart (TAH) for implantation in patients with life-threatening heart failure. Realheart TAH has a unique, patented design that resembles that of the natural human heart. The artificial heart consists of a four-chamber system (two atriums and two chambers) which provides the opportunity to generate a physiologically adapted blood flow that mimics the body's natural circulation. A unique concept in the medical technology world.
