ADDvise receives order from Consto AS worth 2,9 MNOK

ADDvise Group AB's (publ) subsidiary LabRum AB has signed an agreement with Consto AS for a delivery of pass through cupboards to PET center in Tromsø, Norway.

PET (Positron Emissions Tomografi) is a technique creating images used for studying metabolic diseases. The method consists of injecting a radioactively marked substance in the body, the radioactivity can then be traced to detect different diseases. The pass through cupboards, with HEPA filters and lead glass, will be connected to the ventilation.

The order is worth approximately 2,9 MNOK and will be delivered during the second and third quarters of 2017.

- Today's order is once again a proof for our continued growth and presence on the Nordic market, says Rikard Akhtarzand CEO for ADDvise Group AB concerning the new agreement.
