ADDvise develops a new type of imaging table with University of Virginia

ADDvise Group's subsidiary Sonesta Medical AB have signed an agreement with University of Virginia to develop Sonesta's fluoroscopy table 6210 into a standing table for spine or trauma imaging. There is great potential for this product in the US and globally.

The table will be used in examinations of trauma and spine or neurosurgery patients that need to be x-rayed in a standing position. The product is unique in its kind and will greatly benefit both patients and staff at trauma centers. There are 81 Level I trauma centers in the US, where the University of Virginia will be Sonesta's Center of Excellence.
