About Isofol Medical AB (publ)

Isofol is a clinical stage oncology company developing Modufolin® as a first-line treatment of metastatic colorectal cancer and as a rescue drug after high-dose methotrexate treatment in osteosarcoma. Isofol aims to replace the existing folate-based compounds leucovorin and levoleucovorin, which today are considered the standard treatment within these indications. Through an exclusive license agreement, Isofol Medical holds all rights to commercialising Modufolin® globally for cancer treatment with access to the unique patented production process and the production capabilities of Merck KGaA, Darmstadt, Germany.
