

TagMaster ships RFID technology for attendance monitoring and asset security at University of Sabah, Borneo.

Kuala Lumpur, Malaysia, 18 September, 2012 - TagMaster, the leading producer of advanced long-range and high-performance identification systems based on Radio Frequency Identification (RFID), has received an additional order for the expansion of the student and computer tracking system installed at University of Sabah, Borneo.

The order is for additional 2400 units of TagMaster's Samui and Edam RFID tags along with extension of the school's network of Celebes RFID readers to be deployed during October & November 2012. The initial deployment was completed in May 2012.

Utilising TagMaster's Samui and Edam RFID tags working at ranges up to 60 metres together with the excellent multiple tag handling capabilities of TagMaster's Celebes RFID readers, the system serves to meet the University's requirements for monitoring student distribution across the campus, reduce loss of valuable assets and monitor attendance.

"This expansion order is a proof that the system is working well and is now being extended to additional faculties within the campus", says Martin Hamevie, Chief Executive of TagMaster's Malaysian subsidiary. "We expect further orders from the same school during 2012 and 2013 to eventually cover the complete campus as well as daughter-campus."

About TagMaster

TagMaster is an application driven technology company that designs and markets advanced radio frequency identification (RFID) systems and information products for demanding environments. Application areas include vehicle access control, rail bound transportation and logistics, in order to increase efficiency, security, convenience and to decrease environmental impact. TagMaster has a subsidiary in Malaysia and dedicated agencies in the US and in China and exports mainly to Europe, Middle East, Asia and North America via a global network of partners, systems integrators and distributors. TagMaster was founded in 1994 and has its headquarters in Stockholm. TagMaster is a public company and its shares are traded on First North stock exchange in Stockholm, Sweden. TagMaster's certified adviser is Remium AB.
