

Azelio is selected to present its energy storage at the 2021 NREL Industry Growth Forum

As one of 40 emerging cleantech companies selected globally, Azelio will present its energy storage solution TES.POD to investors and other cleantech industry stakeholders at the 2021 NREL Industry Growth Forum.

Azelio has been selected to present its TES.POD to investors and industry representatives at the 2021 NREL Industry Growth Forum (IGF), to be held virtually on April 20-22, 2021. The IGF, celebrating its 26th anniversary, is hosted by the U.S. Department of Energy's National Renewable Energy Laboratory (NREL). It is one of the nation's premier events for cleantech entrepreneurs and other industry experts. Azelio was selected following an extensive selection process.

"We are proud to be among the global top 40 companies, and as the only one from Sweden, selected for the 2021 NREL Industry Growth Forum. Making clean power affordable and available on-demand where it is needed and around the clock is a must for a global green transition. We look forward to presenting how Azelio is making this possible to investors and industry representatives at the forum in April", says Jonas Eklind, CEO of Azelio.

More than 600 cleantech investors, entrepreneurs, and industry representatives are expected to attend this year's IGF. Among them will be 40 of the world's most promising emerging cleantech companies, including Azelio, that will be presenting their cleantech innovations.

"We're facing global pressures to reduce negative climate impacts and ensure clean water, clean air, and sustainable energy and food systems", said IGF Program Manager Sheila Ebbitt. *"We received applications from around the world and across technology sectors. It was a challenge for our investor selection committee to narrow the selection down to the top 40 startups."*

About Azelio

Azelio specializes in energy storage with electricity and heat production. The technology is revolutionary in that the energy becomes dispatchable, making renewable energy available around the clock. The energy is stored in recycled aluminium from which it is converted into electricity and heat with a total efficiency of up to 90 percent. The solution is scalable, sustainable, and cost-efficient from 0.1 MW up to 100 MW. Azelio has approx. 160 employees with headquarters in Gothenburg, production in Uddevalla and development centres in Gothenburg and Åmål, as well as presence in Stockholm, Beijing, Madrid and Ouarzazate. Azelio is listed on Nasdaq Stockholm First North Growth Market with FNCA Sweden AB as Certified Adviser: +46(0)8-528 00 399, info@fnca.se. More about Azelio: www.azelio.com
