Core Keeper Released Today

Pugstorm and Fireshine Games (formerly Sold Out Games) are proud to announce that mining sandbox adventure Core Keeper is available to download now on Steam Early Access on PC.

Following a successful showing at Steam Next Fest last month, which saw over 130,000 players downloading and playing the Core Keeper demo, the Early Access release introduces major new features, including fishing, railroads, automation, electricity, new enemies, items, weapons, a new nature biome, three new bosses and more.

Core Keeper is a 1-8 player mining sandbox adventure set in an ancient cavern of creatures, treasures and trinkets. Mine relics and resources to build your base, craft new equipment and survive. Defeat giant monsters, discover hidden secrets, farm crops, go fishing, cook new recipes and explore a procedurally generated underground world to unravel the mystery of the ancient core.

Core Keeper is available now on PC via Steam Early Access. For more information, follow @CoreKeeperGame on Twitter and join the discussion on Discord.
