About Asarina Pharma

We are a Swedish biotech company developing Sepranolone, the world's first dedicated treatment for premenstrual dysphoric disorder (PMDD) and other menstrual-related conditions. Our product pipeline is built on over 40 years' research into menstrual-related disorders like PMDD and menstrual migraine. With our new family of GAMSAs (GABA_A Modulating Steroid Antagonists), we aim to deliver a new generation of efficacious and safe drugs for still widely untreated conditions, thereby becoming a leading Women's Health company.

This information is information that Asarina Pharma AB (publ.) is obliged to make public pursuant to the Securities Markets Act. The information was submitted for publication, through the agency of the contact persons set out above, on April 17, 2019 at 08:00 CET.
