

SolTech Energy

Two more installations – 878 KW and 257 KW, respectively – are now coupled to the central electric network in China, generating income

The number of coupled installations held by SolTech's subsidiary, ASRE, now totals 25, equivalent to a total capacity of 25.6 MW (megawatts). Calculated on a cumulative, 12-month rolling basis, income from these coupled installations is estimated to amount to approximately 40.6 MSEK (4.1 MEUR) with a good margin of profit. As ASRE is consolidated in the SolTech concern in accord with the Proportional Method, SolTech's established share of this income is 51 percent.

SolTech Energy in brief

SolTech Energy develops and sells building-integrated solar energy products for all forms of building structures – commercial, public and residential. The products are a part of a building's outer shell, as a roof, wall or window, containing semi-transparent solar cells for the production of electricity that simultaneously shade out solar heat. Soltech Energy Sweden AB (publ.) is traded on First North at Nasdaq Stockholm, under the symbol "SOLT" with over 13,000 shareholders. Also included in the concern are its jointly owned (51%) subsidiaries ASAB in Sweden and ASRE in China, as well as its wholly owned subsidiary Wasa Rör T Mickelsson AB. The company's Certified Advisor is G&W Fondkommission (securities broker). For more information see: www.soltechenergy.com.

Investment in China

SolTech's investment in China is carried out by a jointly owned company, Advanced SolTech Renewable Energy (Hangzhou) Co. Ltd (ASRE), where SolTech owns 51 percent and Advanced Solar Power Hangzhou Inc. (ASP) owns 49 percent. The business model consists of having ASRE finance, install, own, and periodically service solar energy installations mounted on the roofs of customer-owned facilities. The customer does not pay for the installed solar energy unit, but instead undersigns a long-term, 20-25 year contract to buy all the electricity and/or thermal heat the relevant unit produces. ASRE's current income comes from the sale of electricity to customers, along with various forms of subsidies per produced kWh. Focus is now concentrated on building a backlog of orders for 2017 and beyond, with the goal of obtaining an installed capacity of 605 MW (megawatts) by the close of 2021, which in 2022 will be set into full operation, generating current annual sales amounting to approximately 1 billion SEK (100 MEUR).
