

Yet another installation – capacity: 2.89 MW (megawatts) – is now coupled to the central electric network, generating income.

SolTech's subsidiary ASRE has now coupled a total of 28 solar energy installations, equivalent to a sum total capacity of 31.96 MW, to the central network in China. Calculated on a cumulative 12-month rolling basis, these coupled installations are estimated to generate income amounting to approximately 48.26 MSEK (4.8 MEUR) with a handsome margin of profit. As ASRE is consolidated into the SolTech concern in accord with the Proportional Method, the concern's share of this income is 51 percent.

The information contained in this press release conforms to that which SolTech Energy Sweden AB (publ.) is required to make public according to the EU's regulation 596/2014 concerning securities market abuse. Said information is furnished, via the above-cited contact person's authorization, for publication on 24 April 2018, 07:00 CET.

SolTech Energy in brief:

SolTech Energy develops and sells building-integrated solar energy products for all forms of building structures – commercial, public and residential. The products are a part of a building's outer shell, as a roof, wall or window containing semi-transparent solar cells for the production of electricity that simultaneously shuts out solar heat. Soltech Energy Sweden AB (publ.) is traded on First North at Nasdaq Stockholm, under the symbol "SOLT" with over 14,000 shareholders. Also included in the concern are its jointly owned (51%) subsidiaries ASAB in Sweden and ASRE in China – more info on ASRE appears below The company's Certified Advisor is G&W Fondkommission (securities broker). For more information see: www.soltechenergy.com

Investment in China

SolTech's investment in China is carried out by a jointly owned company, Advanced SolTech Renewable Energy (Hangzhou) Co. Ltd (ASRE), where SolTech owns 51 percent and Advanced Solar Power Hangzhou Inc. (ASP) owns 49 percent. The business model consists of having ASRE finance, install, own, and periodically service solar energy installations mounted on the roofs of customer-owned facilities. The customer does not pay for the installed solar energy unit, but instead undersigns a long-term, 20-25 year contract to buy all the electricity the relevant unit produces. ASRE's current income comes from the sale of electricity to customers, along with various forms of subsidies per produced kWh. Focus is nowconcentrated on building a backlog of orders for 2018 and beyond, with the goal of obtaining an installed capacity of 605 MW (megawatts) by the close of 2021, which in 2022 will be set into full operation, generating current annual sales amounting to approximately 1 billion SEK (100 MEUR).
