The information contained in this press release conforms to that which SolTech Energy Sweden AB (publ.) is required to make public according to the EU's regulation.596/2014 concerning securities market abuse. Said information is furnished, via the above-cited contact person's authorization, for publication on 21 November 2017, 16:00 CET.

SolTech Energy in brief

SolTech Energy develops and sells building-integrated solar energy products for all forms of building structures – commercial, public and residential. The products are a part of a building's outer shell, as a roof, wall or window, containing semi-transparent solar cells for the production of electricity that simultaneously shade out solar heat. Soltech Energy Sweden AB (publ.) is traded on First North at Nasdaq Stockholm, under the symbol "SOLT" with over 12,000 shareholders. Also included in the concern are its jointly owned (51%) subsidiaries ASAB in Sweden and ASRE in China, as well as its wholly owned subsidiary Wasa Rör T Mickelsson AB. The company's Certified Advisor is G&W Fondkommission (securities broker). For more information see: www.soltechenergy.com.

Investment in China

SolTech's investment in China is carried out by a jointly owned company, Advanced SolTech Renewable Energy (Hangzhou) Co. Ltd (ASRE), where SolTech owns 51 percent and Advanced Solar Power Hangzhou Inc. (ASP) owns 49 percent. The business model consists of having ASRE finance, install, own, and periodically service solar energy installations mounted on the roofs of customer-owned facilities. The customer does not pay for the installed solar energy unit, but instead undersigns a long-term, 20-25 year contract to buy all the electricity and/or thermal heat the relevant unit produces. ASRE's current income comes from the sale of electricity to customers, along with various forms of subsidies per produced kWh. Focus is now concentrated on building a backlog of orders for 2017 and beyond, with the goal of obtaining an installed capacity of 605 MW (megawatts) by the close of 2021, which in 2022 will be set into full operation, generating current annual sales amounting to approximately 1 billion SEK (103 MEUR).
