

Soltech's subsidiary NP-Gruppen signs framework agreement with HBV, which is estimated to be worth between 150-250 million SEK over three years

NP-Gruppen has signed a framework agreement with HBV to supply sealing roofs. The contract period is 2019-12-19 - 2021-11-30 with the possibility of one or more extensions. NP-gruppen's part of the framework agreement is estimated to be worth between 150-250 million SEK over three years and applies to 148 municipalities where NP-Gruppen is ranked as the 1st supplier.

In 2019, the NP Group has systematically expanded its range of services with sealing roofs where the potential for solar energy is greater compared to sheet metal roofs. In the framework agreement, NP-Gruppen is ranked as the 1st supplier in the following counties, which includes a total of 148 municipalities: Södermanland County, Östergötland County, Jönköping County, Kronoberg County, Kalmar County, Gotland County, Halland County, Västra Götaland County, Jämtland County, Västerbotten county and Norrbotten county.

HBV is a purchasing function for Sweden's public utility housing company consisting of just over 360 members. HBV conducts coordinated procurement for products and services related to construction, renovation and management of properties. HBV has sales of just over SEK 2 billion.

CEO Stefan Ölander comments:

- We are very proud of this large framework agreement, which means a big lift for the NP Group. The framework agreement applies to sealing roofs and we see obvious synergies with the existing framework agreement on solar energy that NP-Gruppen already has with HBV.
