Boule Diagnostics wins tenders in Egypt

Boule Diagnostics AB has won two major public tenders in Egypt for around 200 hematology systems in total. Successive deliveries of the instruments will start in December 2016. The final shipment is expected to be made in the first half of 2017. The procuring authorities are the Ministry of Defence and Ministry of Health.

“Egypt is a large and very interesting market for Boule and we feel we can continue to grow and take market shares there. We are naturally delighted that our run of public tender successes is continuing as it confirms that demand for our high quality products is increasing,” said Ernst Westman, CEO and President, Boule Diagnostics.
