

## **HANZA grows with customer in digital access**

**HANZA AB (publ) announces that a global developer of digital solutions doubles its order value for 2023 – worth more than SEK 60 million.**

– It's fantastic to see a customer, in a very exciting segment, grow so quickly together with us. It shows the strength of our flexible manufacturing concept, which enables us to quickly follow volume increases, says Veronica Svensson, Sales Director Scandinavia.

The customer operates in a highly interesting segment, developing a new standard for access to computers, mobile devices, servers, and Internet accounts, which means that they have high demands on security.

– Information security is an area that is getting more and more important for product owning companies. Our ability to also meet high security demands is an additional benefit for our customer, says Veronica Svensson.

The initial manufacturing agreement with the customer was signed less than a year ago and deliveries started in April this year.
