

Vicore Pharma postpones publication of year-end report

Mölnadal, February 13, 2019 - Vicore Pharma Holding AB (publ) has decided to postpone the publication of the year-end report for 2018. The year-end report will be published on March 15, 2019, instead of previously announced February 22, 2019.

The reason for postponing the report is the decision to convert the company's accounting principles to IFRS as per the year-end report for 2018. Conversion to IFRS is an important part of the preparations for the up-listing to the Stockholm Nasdaq main list which is planned to take place during the second half of 2019.

About Vicore Pharma Holding AB (publ)

Vicore Pharma is a Swedish rare disease company focused on interstitial lung diseases and related indications. The company currently has two drug development programs, VP01 and VP02.

VP01 aims to develop the substance C21 for the treatment of idiopathic pulmonary fibrosis ("IPF"). As a result of the acquisition of INIM Pharma AB in August 2018, the company's pipeline was expanded with a second drug development program, VP02. VP02 is based on a new formulation and delivery route of an existing immunomodulatory compound (an "IMiD"). VP02 focuses on IPF with regards to both the underlying disease and the severe cough associated to IPF. VP01 and VP02 are also evaluated for other indications within the area of interstitial lung diseases. The acquisition of INIM Pharma meant an expansion of Vicore Pharma's operations and that the company's strategy became focused on developing drugs for the treatment of rare and severe lung diseases.

VP01 will initiate an expanded dose escalating Phase I study in the beginning of 2019 and the Phase IIa study in IPF patients is expected to start six months later. VP02 is entering a phase of optimization of formulation before local tolerability studies will commence. The first clinical studies with VP02 are expected to start in 2020.
