

TagMaster wins substantial order for Metro Application

Stockholm, Sweden, May 21 2008 - TagMaster, the leading producer of advanced RFID solutions for rail applications, has received a substantial order to supply equipment for use on a major Metro system in Europe.

The order, valued at 4.6 MSEK, is for TagMaster's Heavy Duty series of RFID readers. The equipment will be used to enable Selective Door Opening (SDO) functionality onboard metro trains. SDO systems are used to ensure that only selected doors on trains are opened at specific platforms. TagMaster's HD readers will be mounted under the trains and provide an SDO activation signal to the onboard door control systems.

"This SDO function adds to the growing range of applications TagMaster is able to offer the rail industry. Our ability to adapt the HD product range to suit new applications is key factor to our success with the transportation sector" says Richard Smith, Director - Transportation at TagMaster AB.

About TagMaster

TagMaster is a Swedish technology company founded 1994 with headquarters in Kista (Stockholm), Sweden. TagMaster designs and markets advanced long-range radio frequency identification (RFID) systems and information services associated with automatic vehicle identification, rail bound transportations and people access, in order to increase efficiency, security, convenience and to decrease environmental impact. TagMaster exports mainly to Europe, Asia and North America via global network of partners, systems integrators and distributors. TagMaster shares are traded on First North in Stockholm, Sweden. TagMaster's Certified Adviser is Remium AB. www.tagmaster.com
