

TagMaster North America announces that AMAG Technology joins cadre of leading TagMaster compatible access control systems

Stockholm, Sweden, 7 October, 2010 – TagMaster, the leading producer of advanced long-range, high-performance identification systems for Automatic Vehicle Identification (AVI) solutions has today announced that AMAG Technology joins the group of leading access control systems which has been verified as TagMaster compatible.

Test results affirm compatibility of the TagMaster LR-series Reader with AMAGs family of proximity readers and door controllers (including the Symmetry EN-1DBC Power over Ethernet one door controller, a ground breaking IP-based access control solution), two product lines among several that comprise the Symmetry Security Management Solution, a unified building security solution. The reliable performance and long-range capability of the LR-6 Reader (up to 14 meters, exceeding product sheet specs) was also confirmed with high confidence levels. Additionally, the ability to gain building access and parking access through the use of only one card the TagMaster CombiTag was put to the test, using AMAGs proximity readers, and handily met expectations.

Using the next-generation TagMaster RFID technology, in tandem with AMAG Technologys innovative line of door controllers, vehicles gain fast and convenient parking access, completely hands-free, without causing the driver to stop, open the car window, fumble to search for the card and position it in a specific direction relative to the reader.

About AMAG

AMAG Technologys Symmetry Security Management and Video Solutions can be found in a wide spectrum of markets: government, commercial, education, transportation, healthcare, utilities and banking. Based out of Torrance, California with sales and support located throughout the US, AMAG sells its Symmetry Product Portfolio of access control and network video systems through its Symmetry Authorized Resellers throughout North America. AMAG Technology is part of G4S Technology, a leading manufacturer of scalable, integrated security management systems head-quartered in Tewkesbury, Gloucestershire, England. AMAG Technology has been at the leading edge of access control technology for over 30 years.

About TagMaster

TagMaster is a Swedish technology company founded 1994 with headquarters in Kista (Stockholm), Sweden. TagMaster designs and markets advanced long-range radio frequency identification (RFID) systems and information services associated with automatic vehicle identification, rail bound transportations and people access, in order to increase efficiency, security, convenience and to decrease environmental impact. TagMaster exports mainly to Europe, Asia and North America via global network of partners, systems integrators and distributors. TagMaster shares are traded on First North in Stockholm, Sweden. TagMasters Certified Adviser is Remium AB.
